INTRODUCTION.....	xi to xiv
TABLES OF POPULATION AND SOCIAL STATISTICS.	
TABLE I. Total population of each county, city and town at various periods from 1708 to 1895, inclusive.....	2 to 3
II. Increase or decrease in the population of each county, city and town during various periods from 1774 to 1895, inclusive.....	4 to 7
III. Total population in 1875, 1885 and 1895. Number and percentage of increase or decrease during each period of ten years.....	8, 9
IV. Population. Number and percentage of males and females to total population....	10, 11
V. Population—1885 and 1895—by sex. Number and percentage of increase or decrease....	12, 13
VI. Families. Heads of families, male and female. Average size.....	14, 15
VII. Families. Size, number and population for the State and counties	16, 17
VIII. Families. Number of families of specified sizes.....	18 to 21
IX. Families of seventeen or more persons in detail.....	22 to 24
X. Families. Total number in 1875, 1885 and 1895. Number and percentage of increase or decrease during each period of ten years.	25
XI. Families. Number occupying specified number of rooms..	26 to 29
XII. Dwellings. Number and materials. Number of persons and families to dwellings occupied	30 to 37
XIII. Dwellings. Single dwellings occupied. Number and size.	38 to 41
XIV. Dwellings. Tenement dwellings occupied. Number and size.....	42 to 45
XV. Dwellings. Tenement dwellings partially occupied. Number and size.....	46 to 49
XVI. Dwellings unoccupied. Number and size.....	50 to 53
XVII. Dwellings under construction. Number and size....	54 to 57
XVIII. Dwellings occupied—1875, 1885 and 1895. Number and percentage of increase or decrease during each period of ten years. Percentage of dwellings unoccupied, 1895.....	58
XIX. Population. Area in square miles and density of population of each county, city, town and ward in 1885 and 1895....	59, 60

	PAGE.
TABLE XX. Native and foreign born population in 1885, 1890 and 1895.....	61
XXI. Native and foreign born by sex, with percentages....	62 to 65
XXII. Age. Detail.....	66 to 138
XXIII. White and colored population in 1885, 1890 and 1895..	139
XXIV. Color and race. By sex and nativity	140 to 153
XXV. Color and race. By sex, nativity and age period. . .	154 to 190
XXVI. Population by age periods.....	191
XXVII. Conjugal condition. By sex. Percentage of each class to total population	192 to 195
XXVIII. Conjugal condition. By nativity, sex and specified age periods	196 to 243
XXIX. Conjugal condition. By color and race, sex, nativity and specified age periods.	244 to 257
XXX. Place of birth of native and foreign born. For State and counties.....	258 to 265
XXXI. Place of birth of native and foreign born. For cities, towns and wards.	266 to 313
XXXII. Place of birth in Rhode Island. For State and counties.	314, 315
XXXIII. Place of birth in Rhode Island. For cities, towns and wards.	316 to 337
XXXIV. Place of birth of parents of native and foreign born for the State, counties, cities and towns	338 to 414
XXXV. General parent nativity. For the State, counties, cities and towns.. . . .	415 to 425
XXXVI. Classified occupations. By sex. For the State, counties, cities, towns and wards	426 to 437
XXXVII. Occupations in detail for the State. By sex and place of birth	438 to 485
XXXVIII. Principal occupations in cities and towns. By sex and place of birth....	486 to 529
XXXIX. School attendants, absentees and minors employed, 7 to 15 years of age, inclusive. By age periods, sex and general nativity of father...	530 to 553
XL. Occupations of minors, 7 to 15 years of age, inclusive. For the State. By age periods, sex and place of birth of father.....	554 to 563
XLI. Illiterates. Population 10 years of age and over. Number and percentage of illiterates by sex and general nativity. For the State, counties, cities and towns.....	564 to 568
XLII. Illiterates. By age periods, sex and general nativity. For the State, counties, cities, towns and wards . . .	569 to 593
XLIII. Illiterates. By age periods and place of birth of father. For the State and counties.....	594 to 597
XLIV. Illiterates. By sex and place of birth of father. For cities and towns.. . . .	598 to 605

TABLE XLV.	Relation to head of family. By sex. For State, counties, cities and towns.	606 to 611
XLVI.	Population by dependent, productive and aged periods. Number and percentage to total population	612, 613
XLVII.	Population by school, military and voting ages	614, 615
XLVIII.	Political condition. Males 21 years of age and over, legal voters, non-voters and aliens. Number and percentages.....	616 to 619
XLIX.	Political condition. Foreign born male adults by place of birth, showing number of legal voters, non-voters and aliens.	620 to 635
L.	Political condition. Legal voters, non-voters and aliens, by place of birth of father.....	636 to 651
LI.	Political condition. Comparative table showing number who might have qualified to vote, who qualified, and who voted for governor at the State election, 1895.....	652, 653
LII.	Presidential and gubernatorial votes of the State from 1802 to 1896, inclusive.....	654
LIII.	Soldiers and sailors. Number, conjugal condition and branch of service. Children of such under 16 years of age residing in the State. Widows of veterans and pensioners.....	655, 656
LIV.	Foreign born soldiers and sailors by place of birth and political condition.....	657, 658
LV.	Paupers. By age periods, sex, nativity, and nativity of father.....	659 to 661
LVI.	Defective classes. By sex	662 to 665
LVII.	Town and city valuation and rate of taxation, 1885 and 1895, with increase or decrease in same during the decade. State valuation, and town and city indebtedness. Amounts and percentages.....	666, 667
LVIII.	Savings bank depositors. Comparative statistics for 1885 and 1895.....	668
LIX.	School statistics.....	669, 670
LX.	Libraries of one thousand volumes and over in 1896...	671, 672
LXI.	Villages, localities and post offices.....	673 to 684
LXII.	Population of principal villages by sex, with number of families.....	685 to 688

INDUSTRIAL STATISTICS.

TABLE LXIII.	Manufactures. State aggregates by specified industries.....	690 to 693
LXIV.	Manufactures. Aggregates for counties and cities by specified industries.....	694 to 703
LXV.	Manufactures. Aggregates for State, counties and cities.....	702, 703

TABLE LXVI.	Manufactures. Detail for the State by specified industries.	704 to 736
LXVII.	Agriculture. Number of farms of specified sizes.	738, 739
LXVIII.	Agriculture. Summary of agricultural property and product for the State, and for farms of specified sizes.	740, 741
LXIX.	Agriculture. Detail of farm lands, live stock on hand, and annual production for the State and for farms of specified sizes.	742 to 757
LXX.	Agriculture. Detail of quantity and value of farm property and product for counties, cities and towns.	758 to 850
LXXI.	Agriculture. Comparative table. Value of farm lands and capital invested.	851
LXXII.	Agriculture. Comparative table. Value of farm products.	852
LXXIII.	Agriculture. Average monthly wages paid.	853
LXXIV.	Poultry raising. Number and value of birds used for production.	854, 855
LXXV.	Poultry raising. Quantity and value of annual product.	856 to 859
LXXVI.	Poultry raising. Number and value of birds on hand December 1st, 1895.	860, 861
LXXVII.	Bee keeping. Number and value of swarms. Quantity and value of annual product.	862
LXXVIII.	Fisheries. Capital invested.	864
LXXIX.	Fisheries. Vessels and persons employed. Average daily wages.	865
LXXX.	Fisheries. Quantity and value of product.	866, 867
LXXXI.	Commerce. Imports and exports of merchandise by customs districts of the State for the years 1886 to 1895, inclusive.	868 to 897
LXXXII.	American and foreign vessels entering customs districts of the State in years ending June, 30, 1885, 1890 and 1895.	898
LXXXIII.	American and foreign vessels cleared from customs districts of the State in years ending June 30, 1885, 1890, 1895.	898
LXXXIV.	Registered, enrolled and licensed vessels documented in the customs districts of the State.	899
LXXXV.	Registered, enrolled and licensed steam vessels documented in the customs districts of the State.	899
LXXXVI.	Sailing vessels, steam vessels, canal boats and barges in customs districts of the State. Number and gross tonnage.	900
LXXXVII.	Vessels built in customs districts of Rhode Island.	900
LXXXVIII.	Statistics of port of Providence.	901

INTRODUCTION.

The fourth decennial State census has been taken in strict conformity with the provisions of the law contained in Chapter 63 of the Public Statutes. This volume contains hundreds of pages of carefully arranged tables of statistics, and descriptive and analytical matter relating specifically to the population, manufactures, agriculture, fisheries, and business of the State as they existed in the year eighteen hundred and ninety-five.

The volume contains, with minor exceptions, only such matter as has been actually gathered in taking the State census. Therefore, a large mass of matter of an instructive and historical character which was available for this work has been purposely omitted as not being really within the intent and scope of a modern census. The sole purpose of the Census Board has been to gather as fully as possible accurate information upon the various subjects required by law, and afterward to arrange them with the carefulness of detail exacted by the leading statisticians of the country. The result of this effort to arrange and publish a standard work reflecting credit upon the State, and yielding a satisfactory return for the cost and labor involved in its preparation, has resulted in the production of a volume containing more than twice as many pages of statistical tables as were contained in the last similar publication, all carefully collected and collated within the true spirit and purpose of the census law.

The accuracy of the information gathered in a census of the population depends largely upon the intelligent conception which the enumerator has of his duties, and the faithful-

ness with which he performs them. The provisions of the present law in reference to the appointment of enumerators are very defective, and can be greatly improved. The Census Board should have entire freedom and control in the selection of the enumerators, recognizing the value of the merit system entirely; and the qualifications of applicants as developed by a competitive examination conducted under suitable and practical regulations should be the test of fitness for appointment. The arrangement and completion of the tables of statistics bear testimony to the superior and exacting labors of those engaged in this important service. The unanimous endeavor of the Census Board to collect accurate information has justified the Superintendent and those in charge in rigidly reviewing the labors of the population enumerator and the special agents employed in collecting the manufacturing and agricultural schedules, as well as the labor of every person engaged in the work. Any information returned not entirely satisfactory has been carefully analyzed, and, if found defective, has been brought to the attention of the parties interested and invariably rectified. This policy has retarded somewhat the printing of this volume, but its enforcement has been productive of satisfactory results. The entire willingness of the people to give the enumerators the information required has been proverbial, and has added immeasurably to the value of the work. The schedules devoted to manufactures, agriculture, fisheries, poultry, and bee-keeping, were gathered both by mail and special agents. The support given by those interested in the several lines of business enumerated has been exceedingly generous and helpful, and while occasionally some individual or firm objected to giving answers to all of the questions asked, it may be truthfully stated that such instances were very few in number.

The Census Board is greatly indebted to the manufacturers of Rhode Island for the kindly interest they have taken in the preparation of the tables devoted to manufacturing. Their statements to the Board have been treated confidentially,

and their identity carefully protected. The system of registered numbers used in handling the manufacturers' schedules protected absolutely the interest of every manufacturer whose returns were brought in contact with the clerical force of the department.

The thorough investigation of two subjects, viz.: poultry and bee-keeping, was decided upon by the census board after carefully considering the urgent requests of many interested persons. The decision when made did not meet with entire public approval, but the results obtained by the inquiry have very thoroughly destroyed the force of the adverse criticisms made, and sustained the wisdom of the action taken. The magnitude of the poultry business in Rhode Island is shown to be such as to compel its recognition as a prominent industry. Its growth may prove to be of incalculable value to the agricultural sections of the State, and be the means of profitably utilizing some of the neglected farm properties.

The present census is the twenty-second which has been taken in the State, either by the colony, the State, or the national government. The previous census publications were of great public interest when issued, and have attained, by the flight of time, exceptional historic value. The present volume, if judiciously circulated, will be profitably studied by the present generation, and will fill its proper place in history in recording the growth and development of the State during the last decade.

Each census taken, like the preceding one, reveals many changes in population, manufactures, agriculture, and general business. Its pages of tables indicate with equal candor both growth and decline. It is not the duty of the Superintendent of the census to discuss the causes which may have produced decline, or to suggest the remedy required for the restoration of growth in population or industries in declining towns; that labor belongs to others. The registration of these reliable facts in each decade furnishes attractive subjects for the thoughtful consideration of learned and scientific men.

The Superintendent is indebted to all who have been associated with him, whether employed as enumerators, special agents, or in the clerical service, for the zeal and interest they have shown in the discharge of their respective duties ; to Mr. John H. Davis, who was connected with the work for some time, and especially to Mr. Richard W. Jennings, and Miss Henrietta Kiernan (formerly connected with the Eleventh Federal census, at Washington, D. C.) for the faithful and superior service they have rendered the State. The Superintendent has been associated during the progress of the work, with Governors Brown, Lippitt, and Dyer, and also with Secretary of State Bennett, and is grateful to them for their wise counsel and generous support, and sincerely trusts that the completed work may meet with their unqualified approval and reflect credit upon the State of Rhode Island.

+ The counties of Kent and Washington were originally portions of the county of Providence Plantations. The territory included in Washington county was incorporated in 1729 as Kings county, and in 1781 the name was changed to Washington county. Kent county was set off from Providence county and incorporated in 1750.

The areas of the minor civil divisions used in this Census were obtained by planimeter measurements based upon the Topographical Atlas prepared by the United States Geological Survey in 1891. The total area of the State,—1,085 square miles,—accords with the figures used by the United States Census of 1890, and adopted from the most recent government surveys.

* Ward boundaries changed since 1885.

TABLE LXVI.—MANUFACTURES.—DETAIL FOR THE STATE, BY SPECIFIED INDUSTRIES.

	INDUSTRIES.	NUMBER OF MILLS, FACTORIES, OR WORKSHOPS.							
		Number of individual firms.	Mills, factories, or workshops.	Number of co-partnerships.	Mills, factories, or workshops.	Number of corporations.	Mills, factories, or workshops.	Total number of firms.	Total number of mills, etc.
1	Job printing and lithography.....	42	42	20	20	8	8	70	70
2	Illuminants, gas and electricity.....	—	—	—	—	13	17	13	17
3	Lumber, planing and saw mills, doors, sash, blinds	24	24	9	9	2	2	35	35
4	Cabinet making and furniture manufacturing....	6	6	5	5	1	1	12	12
5	Wooden boxes and barrels.....	4	4	4	4	—	—	8	8
6	Miscellaneous wooden ware.....	12	12	1	1	3	3	16	16
7	Pattern making.....	7	7	—	—	—	—	7	7
8	Total for wood work.....	53	53	19	19	6	6	78	78
9	Oleomargarine.....	—	—	—	—	3	3	3	3
10	Flour and grist mills.....	18	18	4	4	—	—	22	22
11	Chemicals and dye stuffs.....	2	2	5	5	2	2	9	9
12	Awnings, tents, and sails.....	2	2	3	3	—	—	5	5
13	Blank books and book-binding.....	1	1	2	2	1	1	4	4
14	Boat and ship building.....	10	10	2	2	2	2	14	14
15	Boot and shoe findings.....	1	1	2	2	2	2	5	5
16	Boxes, paper.....	3	3	2	2	1	1	6	6
17	Brooms and brushes.....	7	7	3	3	—	—	10	10
18	Cardboard and paper.....	1	1	4	4	1	1	6	6
19	Carriages and wagons.....	49	49	10	10	—	—	59	59
20	Cigars and cigarettes.....	29	29	5	5	—	—	34	34
21	Clothing, shirts, etc.....	5	5	3	3	—	—	8	8
22	Confectionery and ice cream.....	20	20	2	2	1	1	23	23
23	Cop and mailing tubes.....	2	2	1	1	—	—	3	3
24	Druggists' preparations and proprietary articles..	9	9	1	1	1	1	11	11
25	Engraving, steel and copper.....	4	4	3	3	1	1	8	8
26	Hats and caps.....	4	4	2	2	—	—	6	6
27	Mattresses and bedding.....	3	3	—	—	—	—	3	3
28	Mineral and soda waters.....	6	6	5	5	—	—	11	11
29	Musical instruments.....	1	1	2	2	—	—	3	3
30	Paints.....	1	1	1	1	1	1	3	3
31	Pickles and preserves.....	3	3	—	—	1	1	4	4
32	Picture frames.....	6	6	—	—	—	—	6	6
33	Rubber stamps and stencils.....	2	2	3	3	—	—	5	5
34	Saddlery and harness.....	43	43	2	2	1	1	46	46
35	Sausages.....	3	3	2	2	—	—	5	5
36	Stucco work.....	1	1	2	2	—	—	3	3
37	Industries not classified.....	6	6	9	9	5	5	20	20
38	Total for the State.....	658	663	368	365	237	312	1,263	1,360

TABLE LXVI.—MANUFACTURES.—DETAIL FOR THE STATE, BY SPECIFIED INDUSTRIES.

	INDUSTRIES.	MILLS, FACTORIES, AND WORKSHOPS OWNED, AND MATERIALS OF CONSTRUCTION.					Number of tenements owned.	Number of mills, factories, and workshops rented.	
		Wood.	Brick.	Stone.	Wood, brick and stone.	Total owned.			
1	Bleaching, dyeing and print works.....	6	6	2	5	19	—	2	1
2	Cotton cloth.....	4	23	26	22	75	2,890	3	2
3	Cotton yarn and thread.....	2	15	7	2	26	—	3	3
4	Cotton braids, laces, tapes, wicks, and small wares...	5	2	—	4	11	46	3	4
5	Cotton hosiery and knit goods.....	2	1	1	—	4	—	2	5
6	Woolen and worsted goods.....	8	6	12	26	52	785	18	6
7	Woolen yarn.....	2	4	2	2	10	—	3	7
8	Shoddy.....	2	—	—	—	2	32	5	8
9	Knit goods, cotton, wool, and silk, including plush...	2	11	1	4	18	40	3	9
10	Lines, twines, and cords.....	4	1	—	—	5	12	1	10
11	Silk goods, braids, and ribbons.....	—	—	—	—	—	—	4	11
12	Insulated wire.....	1	1	—	—	2	6	1	12
13	Rubber tubing and webbing, and hair goods....	1	1	—	—	2	—	4	13
14	Total for textile goods.....	39	71	51	65	226	3,811	52	14
15	Jewelry....	7	4	—	—	11	—	178	15
16	Silverware.....	—	1	—	—	1	—	8	16
17	Electroplating....	—	—	—	—	—	—	14	17
18	Enameling.....	—	—	—	—	—	—	12	18
19	Engraving and chasing.....	—	—	—	—	—	—	14	19
20	Refining, gold, silver, and copper.....	7	5	—	—	12	—	4	20
21	Die sinking.....	—	—	—	—	—	—	18	21
22	Total for jewelry.....	14	10	—	—	24	—	248	22
23	Machinery, general, including screws, bolts, and nails	9	7	—	5	21	—	31	23
24	Machinery and tools.....	6	5	—	1	12	—	5	24
25	Stationary and locomotive engines and boilers.....	—	6	—	2	8	—	5	25
26	Textile mill machinery and metal mill supplies.....	6	9	2	5	22	—	13	26
27	Brass foundries, and finishing.....	4	2	—	—	6	—	13	27
28	Iron foundries, castings, stoves.....	6	6	2	3	17	—	1	28
29	Architectural metal work.....	1	—	—	—	1	—	4	29
30	Sheet metal work and wire goods.....	1	—	—	—	1	—	9	30
31	Total for machinery and metal goods.....	33	35	4	16	88	—	81	31
32	Leather belting and top-roll covering.....	5	—	—	1	6	—	11	32
33	Reeds and harnesses.....	1	—	—	—	1	—	4	33
34	Bobbins, shuttles, spools, and wooden mill supplies..	4	1	—	1	6	—	4	34
35	Total for mill supplies.....	10	1	—	2	13	—	19	35
36	Rubber boots and shoes.....	—	7	1	—	8	—	2	36
37	Breweries, beer, ale, and porter.....	—	3	—	—	3	—	2	37
38	Soaps, oils, and residuary products.....	8	2	—	3	13	—	5	38
39	Stone quarries and monumental work.....	16	3	2	—	21	—	—	39
40	Monumental work, marble and granite.....	31	—	—	—	31	—	14	40
41	Total for stone work.....	47	3	2	—	52	—	14	41

These tables on commerce are prepared from statistics taken from United States reports. Tables LXXXIV to LXXXVII, inclusive, do not include yachts, nor boats and lighters, decked and not masted, employed within the harbor of any town or city, nor barges without sails or internal motive power of their own, employed wholly upon the internal waters of the State, nor barges and boats plying on rivers and not engaged in trade with contiguous foreign territory and not carrying passengers, nor boats under five tons net.

ANALYSIS

AND

EXPLANATORY NOTES.

GENERAL RESULTS OF THE CENSUS.

The State census of 1895 reveals a substantial gain in population and a significant increase in manufacturing interests. In considering the social and industrial condition of the State, as shown in the foregoing tables, it should be remembered that the census year, 1895, followed a period of unusual and protracted business depression, from which Rhode Island, in common with other sections of the country, had not recovered in any noticeable degree. That so general and continuous an interference with national industrial progress as has been experienced in recent years has tended to interfere with the increase of the population, and has relatively depreciated values, is a statement that will pass current without argument. It is impossible to estimate accurately to what extent the depressed conditions influenced the presentations made by this census; but, having in mind the large number of foreign born in the population of the State, it is reasonable to conclude that many persons were induced by the uncertainty of employment to visit their native land, or to migrate to other States in search of work, and thus were lost in the population count of the State when the enumeration was made.

The total population of the State on June 1st, 1895, was 384,758, a gain of 26.45 per cent. since the State census of 1885. This percentage of gain has been exceeded in but two other decades of the past century. During the decade between 1840 and 1850, a period of rapid industrial development, the gain in population was 35.57 per cent.; and between 1865 and 1875, a time of renewed business activity following the civil war, the increase in population was 39.62 per cent. In the 105 years between the national census of 1790 and the State census of 1895 the population of the State grew from 68,825 to 384,758, or 459.04 per cent.; and during that period the only changes in the territorial limits of the State were those occasioned by the transfer of Fall River to Massachusetts in return for what is now a portion of the city of Pawtucket and the town of East Providence. Over one-quarter of this increase was obtained during the last decade.

The increase of foreign born during the decade is one of the most striking facts revealed by this census. Since 1885 the foreign born have increased 37,214, or 43.49 per cent., while the native born have increased 43,260, or 19.78 per cent.

There are now 100 persons of foreign birth to every 213 persons of native birth. Between 1875 and 1885 the native born increased 32,114, or 17.21 per cent., and the foreign born 13,931, or 19.45 per cent.; and in 1885 there were 100 persons of foreign birth to every 256 persons of native birth. In 1875 the native born constituted 72.26 per cent. of the total population; in 1885 the ratio fell to 71.88 per cent., and in 1895 it has decreased to 68.09 per cent.

Canadians, English, Scotch, Germans, Italians, Russians, Swedes and Portuguese, have largely contributed to this increase of foreign born population. In ten years the increase of these nationalities has been: Canadians (principally of French origin), 14,472; English, 6,036; Scotch and Welsh, 2,028; Germans, 1,512; Italians, 4,957; Russians, 1,989; Swedes, 3,416; Portuguese, 1,427. With the exception of the English, Italians and Portuguese, the gain has been almost uniform as to sex. The English show an increase of 2,814 males and 3,222 females; the Italians, 3,302 males and 1,655 females; and the Portuguese, 910 males and 517 females.

The following table shows the increase during the decade in the three age periods known as dependent (under 15 years of age), productive (15 to 59 years of age), and aged (60 years of age and over); and the percentage of same for each sex by general nativity, and for the total population, in each age period:

SEX AND NATIVITY.	DEPENDENT.		PRODUCTIVE.		AGED.	
	UNDER 15 YEARS.		15 TO 59 YEARS.		60 YEARS AND OVER.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Males—Native Born.....	7,983	20.25	13,020	21.95	622	7.97
Males—Foreign Born.....	1,883	48.57	16,288	50.14	1,401	40.19
Total Males.....	9,866	22.78	29,308	31.93	2,023	17.92
Females—Native Born.....	7,754	19.74	13,377	21.10	504	5.30
Females—Foreign Born.....	1,722	43.75	14,162	37.67	1,758	42.01
Total Females.....	9,476	21.92	27,539	27.27	2,262	16.53
Total Native Born.....	15,737	19.99	26,397	21.51	1,126	6.51
Total Foreign Born.....	3,605	46.14	30,450	43.45	3,159	41.18
Total Population.....	19,342	22.35	56,847	29.49	4,285	17.16

Another presentation of the subject is found in the following table, showing the percentage of increase in each age period to the increase of the total population, by sex and general nativity:

SEX AND NATIVITY.	UNDER 15 YEARS.		15 TO 59 YEARS.		60 YEARS AND OVER.		TOTAL.
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.
Males—Native	7,983	36.91	13,020	60.21	622	2.88	21,625
Females—Native.....	7,754	35.84	13,377	61.83	504	2.33	21,635
Total Native.....	15,737	36.38	26,397	61.02	1,126	2.60	43,260
Males—Foreign	1,883	9.62	16,288	83.22	1,401	7.16	19,572
Females—Foreign ...	1,722	9.76	14,162	80.27	1,758	9.97	17,642
Total Foreign.....	3,605	9.69	30,450	81.82	3,159	8.49	37,214
Total—both sexes....	19,342	24.04	56,847	70.64	4,285	5.32	80,474

Of the total increase in the dependent age period the foreign born constitute 18.64 per cent.; of the productive age period the foreign born constitute 53.56 per cent.; and of the aged period 73.72 per cent. Of the native born 61.02 per cent. of the increase is found in the productive age period, and of the foreign born 81.82 per cent.

The tables relating to occupation indicate the industrial branches in which this increase of 81.82 per cent. has secured employment. The Canadians, while employed principally in the textile mills, are also well represented in the trade division as merchants and clerks. Comparisons with the census of 1885 show that the increase of Canadians engaged in manufacturing and mechanical industries during the decade is 3,996 males, or 84.71 per cent., and 1,619 females, or 53.84 per cent.; while there is an increase of that nationality in the trade division of 749, or 156.04 per cent. In the textile divisions of the manufacturing industries the Canadians show an increase of 1,937 males, or 73.32 per cent., and 1,259 females, or 47.58 per cent. Besides the gain in the textile industry, the Canadians have increased 606, or 112.64 per cent., in machinery and metals, tools and jewelry trades, and 949, or 98.75 per cent., in building work. There are also 881 Canadians among the unskilled laborers.

British born (exclusive of Canadians and Irish) show large increases in the trade, transportation, and manufacturing divisions. In the manufacturing divisions there are employed 2,117 more

males and 548 more females of British birth than in 1885; the males being engaged chiefly in building work, machinery and metals and textiles.

Germans are also employed in large numbers in the manufacturing industries, especially in the textile mills, with a fair representation among wood workers, brewery operatives, and jewelers. The Swedes are not well represented in the trade division, but are principally employed as teamsters, farm laborers, jewelers, machinists, metal workers, carpenters and textile mill operatives. The females of that nationality have entered the field of domestic service in large numbers, and in this census there are reported 752 Swedish servants; a number exceeded by no other nationality except Irish and native born.

The Italians are engaged principally in common laboring work. Among the unskilled laborers there are 690 of Italian birth, while under the city government, public works department, 252 of that nationality are found. In the manufacturing division, whether as textile mill employees or stone workers, in which latter vocation the Italians have a representation of 393, they are as a rule doing work which requires more manual labor than skill. On the other hand there are to be found 95 tailors and 116 barbers and hair dressers of Italian birth.

Of the total number of unemployed persons over 16 years of age, those of foreign birth are comparatively few. Of the non-productive class, including children at home, scholars and students, of which there are 131,273, the foreign born number 16,204, or 12.34 per cent. Of the scholars and students 55,627 are native born, and 7,181, or 11.43 per cent., are foreign born.

One result of the increase of foreign born during the decade has been the diminution of the excess of females over males in the total population. In 1885 there were 11,498 more females than males, or 1,000 males to every 1,078 females. There are now 9,578 more females than males, or 1,000 males to every 1,051 females. It is not apparent that the native born have contributed to this change; for although during the decade there has been an excess of 20,383 births over deaths, of which number 11,477 were males and 8,906 were females, yet this excess of males in the native born is undoubtedly counteracted by migration to other States. The United States census of 1880 showed that there were 49,235 persons born in Rhode Island but living in other States. In 1890 this number was 52,608, an increase of 3,373, probably mostly of

the male sex. Further, the numerical increase of the native born of each sex during the decade has been almost equal; the native males having increased 21,626, and the females 21,634. On the other hand the increase in the foreign born males has been 19,571, while that of the females has been 17,643. The percentage of increase of sexes by general nativity during the decade has been, native males 20.30 per cent., native females 19.28 per cent.; foreign males 49.11 per cent., foreign females 38.60 per cent.

No particular change is noticed in the family relations of the people during the decade, except that the increase in the number of divorced persons has been very small. In 1885 the single formed 55.57 per cent. of the total population; the married, 37.68 per cent.; widowed, 6.37 per cent.; and the divorced, .38 per cent. By this census the single constitute 55.82 per cent.; married, 37.58 per cent.; widowed, 6.29 per cent.; and divorced, .31 per cent. This shows a slight proportional gain for the single condition at the expense of a small decrease, proportionally, in the married and widowed. The increase in the single during the decade is 45,700, or 27.03 per cent.; in the married, 29,930, or 26.10 per cent.; in the widowed, 4,820, or 24.86 per cent.; in the divorced, 24, or 2.07 per cent. Compared by general nativity the native born, single, have increased 22.98 per cent.; married, 14.39 per cent.; the foreign born, single, 43.80 per cent.; married, 44.46 per cent. The force of this comparison is seen when considered together with the increase during the decade in the total native born of 19.78 per cent., and in the total foreign born of 43.49 per cent.

In connection with the family relation it is of value to refer to the number of births reported in 1895. In that year there were 3,292 children born of native parents, 4,760 of foreign parents, and 1,830 of mixed parents. This census shows 80,054 married persons of native birth, and 64,534 of foreign birth. From these figures it will be found that there has been one birth to every 19 native born married persons, and one birth to every 11.4 foreign born married persons. The number of marriages reported during the decade in the State is 31,969.

The great extension and improvement in school facilities, and the more rigid enforcement of the laws relating to the employment of children that mark the decade ending with this census, are reflected in the tables relating to the school attendance, and minors at work. The total population between the ages of 7 and 14 years, inclusive, is 53,802, an increase of 7,920, or 17.26 per

cent., since 1885. The total number of children attending school between the ages of 7 and 14 years, inclusive, is 47,570, an increase during the decade of 7,670, or 19.22 per cent.; a very favorable showing when compared with the increase of 17.26 per cent. in the total population of that age period. Of the ages under consideration there are 6,232 children not attending school, who are either at home or at work, an increase in that class of only 4.18 per cent. during the decade. There are 6,565 children between the ages of 7 and 15 years, inclusive, who are absent from school at work, a decrease of 1,446, or 18.05 per cent., since 1885. The increase in the total population between the ages of 7 and 15 years, inclusive, is 17.43 per cent. during the decade.

It is gratifying to find that illiteracy is decreasing in spite of a class of immigration that has contributed to an opposite result. In considering this subject the total population ten years of age and over is used as a basis. The number of persons who cannot read or write, or who cannot write, is 29,752, an increase of 3,439 since 1885. The percentage of illiterates, however, to the total population is less than in 1885. Ten persons in every 105 are illiterates, while in 1885 the proportion was 10 persons in every 94. Reviewing the subject by general nativity, it is found that ten persons in every 367 of the native born are illiterates, and ten persons in every 48 of the foreign born. In 1885 the proportions were ten persons in every 270 of the native born, and ten persons in every 40 of the foreign born. Of the males, ten in every 109 are illiterate, and of the females ten in every 101. In 1885 the proportions were of the males, ten in every 108; and for the females, ten in every 84. It is evident that the proportional decrease in illiterates is to be credited to the native born, and chiefly to the native born females, who show a decrease of 516 illiterates during the decade. Considered by nativity of father there is a decrease during the decade of 22.41 per cent. in illiterates born of native fathers, and an increase of 18.45 of those born of foreign fathers. In the latter are included those of unknown parentage.

The following nationalities, considered by birth-place of father, show an increase of illiterates during the decade: Canadians, 3,415; Italians, 2,819; Portuguese, 827; Germans, 143; other nationalities, principally Russians, Turks (Armenians), Swedes, Austrians, Belgians and Chinese, 1,318. The Irish show a decrease of 4,224 illiterates, and other British (exclusive of Canadians) 82.

The following table shows the population ten years of age and over, the number of illiterates and percentage of the same to the total population by sex and general nativity, for the years 1885 and 1895:

YEAR.	POPULATION 10 YEARS OF AGE AND OVER.				
	MALES.		FEMALES.		TOTAL.
	Native.	Foreign.	Native.	Foreign.	
1895.....	94,414	56,696	100,148	60,612	311,870

1885.....	3,241	3.80	12,168	27.86	15,409	11.95

The statistics of manufacturing presented in this census indicate great development during the decade in all the industrial lines for which this State is remarkable. Throughout the tables relating to manufactures a large increase will be found in the amount of capital invested. This is explained by the fact that the figures for 1885 representing capital invested include only the value of buildings, land and machinery, while in this census an effort was made to secure from each manufacturer a statement of live assets, such as raw material, stock in process, and finished product on hand, and book accounts, all of which are now embraced in the item "capital invested." The census of 1885 showed a total capital invested of \$59,616,229; persons employed, 63,349; wages paid, \$23,353,099; value of annual product, \$95,452,085. But these figures include certain lines of mechanical industry, such as building, boot and shoe repairing, tailoring, photography, and bread products, which are not distinctly manufacturing and which have not been considered in this census.

Deducting numbers and values which it is estimated these particular industries represent in the 1885 report of manufactures, the total gain during the decade will be found to be approximately as follows: capital invested, \$68,000,000; persons employed, 22,000; wages paid, \$10,500,000; value of annual product, \$31,000,000. The following table will show, as far as is practicable, the increase during the decade in five of the principal manufacturing industries of the State:

INDUSTRIES.	Capital Invested.	Persons Employed.	Wages Paid.	Value of Product.
Textiles.... 1895	\$73,536,762	48,892	\$16,660,084	\$65,656,007
“ 1885	36,171,323	36,675	10,676,042	47,816,193
Gain in 10 years	\$37,365,439	12,217	\$5,984,042	\$17,839,814

A decline in the total values of farm property and product is shown by the agricultural statistics, which, however, is in harmony with the well known tendency prevailing during the decade. Nevertheless, the presentation from the farm reports indicates that farming in the State is by no means an unimportant industry and is worthy of the fostering care which the State has been disposed to give to it in recent years. The most noticeable feature of the agricultural tables is an increase of \$1,044,666.58 in the value of dairy products as compared with 1885, from which it might be

inferred that the farmers are realizing their opportunities in that direction. In connection with agriculture is presented a report of poultry raising in 1895 which will attract attention. An attempt was made at the request of several organizations to obtain a report from every poultry keeper, including those not engaged in agriculture. Returns were received from 11,151 poultry keepers, showing that the year's production of poultry and eggs amounted to \$1,178,183.45, on a total outlay of \$300,585.79. On November 1st, 1895, the poultry live stock on hand amounted to \$397,598.12.

The foregoing is only a general survey of the changes in the social and industrial life of the State, indicated by this census compared with previous enumerations. A more extended review of the statistical tables is furnished in the following pages.

POPULATION—INCREASE OR DECREASE.

Tables I, II and III treat of the total population of the State, counties, cities and towns. The first table shows the population according to twenty-two censuses, from 1708 to 1895, inclusive. The second table shows the increase or decrease in the population during sixteen census periods, from 1774 to 1895, inclusive.

The census of 1708 was the first ordered by the General Assembly of the colony. The territory at that time was divided into two counties, those of Rhode Island and Providence Plantations. Rhode Island county consisted of the island towns of Jamestown, Newport, New Shoreham, and Portsmouth. Providence Plantations embraced the towns of East Greenwich, Kingstown, Providence, Warwick, and Westerly. This county organization was instituted in 1703, sixty-seven years after the first settlement of Providence. The dates of the settlement or incorporation of the nine towns existing at the time of the first census are as follows: Providence, 1636; Portsmouth, 1638; Newport, 1639; Warwick, 1642-43; Westerly, 1669; New Shoreham, 1672; North Kingstown, 1674; East Greenwich, 1677; Jamestown, 1678. Before the census of 1730 was taken, the town of Kingstown was divided into North and South Kingstown; and that which is now known as Washington county was formed of the towns of Westerly, North Kingstown and South Kingstown, under the name of King's county. In 1729 the name of Rhode Island county was changed to Newport county, and that of Providence Plantations to Providence county; and in 1781 the name of Kings county was changed to Washington county. At the time of the census of 1748 the colony was divided into twenty-four towns and four counties, embracing the territory it covers to-day with the exception of changes brought about by interchange of land with the State of Massachusetts in 1862. Between the census of 1730 and that of 1748 the following changes were made: Smithfield, Scituate, and Glocester were formed from Providence; Charlestown was

detached from Westerly, and the former town was also divided to form the town of Richmond; Coventry was set off from Warwick, and East Greenwich was divided to form the town of West Greenwich; Exeter was incorporated from North Kingstown, and Middletown from Newport; Bristol, Warren, Tiverton, Little Compton and Cumberland were acquired from the colony of Massachusetts; Cumberland was added to Providence county; Bristol county was formed of Bristol and Warren; and Tiverton and Little Compton were annexed to Newport county. In 1750 Kent county was formed of Coventry, East Greenwich, Warwick, and West Greenwich. When the census of 1755 was taken, Cranston had been added to the list of towns, it having been formed from a portion of Providence. Between 1755 and 1774 four new towns were incorporated: Hopkinton from a part of Westerly, Johnston and North Providence from Providence, and Barrington from Warren. No further changes in the civil divisions of the territory occurred until 1781, when Foster was set off from Scituate. From that period until 1806 there was no important change; but in that year Burrillville was formed from Glocester. The next change in the civil divisions of the State is found in the census of 1860, caused by the incorporation of the town of Fall River from part of Tiverton. Fall River, however, was ceded to Massachusetts in 1862, by the settlement of a boundary dispute, in exchange for East Providence and Pawtucket, which were added to Providence county.

Between the censuses of 1865 and 1870 the town of Woonsocket was formed from part of Cumberland, and parts of Cranston and North Providence were given back to Providence. In 1871 three portions were taken from Smithfield, one of which was annexed to Woonsocket, and the other two formed the towns of Lincoln and North Smithfield. The city of Providence acquired additional territory from Cranston in 1873, and from North Providence in 1873 and 1874. In 1874 a portion of North Providence was also added to the town of Pawtucket. In 1888 the district of Narragansett was divided from South Kingstown and given all the powers of a town except representation in the General Assembly. The city of Central Falls was incorporated in 1895 from a portion of the town of Lincoln. The five cities of Rhode Island were incorporated as follows: Newport, first time, 1784; charter repealed in 1787; incorporated as a city the second time in 1853; Providence, 1832;

Pawtucket, 1885; Woonsocket, 1888, and Central Falls in 1895. Changes were made in the boundary lines of the wards of Newport and Providence, between the census of 1885 and 1895, which render comparisons by wards in those cities impossible. Slight additions from Cranston were made to the city of Providence in 1887 and 1892.

The first five censuses given in Table I were taken by order of the General Assembly while Rhode Island was a colony. Those of 1776 and 1784 were taken while it was still a free and independent State. That of 1790 was the first one ordered by the United States, and from that year until 1865 the reports are those of enumerations made by the national government. Since 1865 the State has taken a census every ten years in addition to those taken by national authority.

The story interwoven with the figures of the first two tables is one of wars, business depression, prosperity, decline of commerce and agriculture, growth of manufacturing and a continually increasing tide of immigration. The fluctuations in the population of the State and of certain civil divisions from time to time show the influence of all these factors. The census of 1776 reveals the effect of the War of Independence. The State in two years lost 4,696 of its population, to which decrease Newport contributed nearly half of its people. The war of 1812 seems also to have affected the growth of the State, for the census of 1820 showed an increase of only 7.83 per cent. in the total population, while the censuses of 1810 and 1830 showed a gain of 11.44 per cent. and 17.04 per cent., respectively. The small increase from 1790 to 1800 of only .43 per cent. has never been satisfactorily explained. It has been suggested that it was due to migration westward, while another explanation is furnished in the assumption that the enumeration of 1790 was incorrect, as it is thought that the population of some of the towns, particularly those of Washington county, was much smaller than was actually reported. The fact that the increase from 1782 to 1790 was the unusual one of 31.48 per cent., a proportional gain exceeded in only two other census decades, seems to confirm the latter explanation. The increase of only 11.95 per cent. indicated by the census of 1840 is to be attributed to the period of business depression about that time, while the increase of 35.57 per cent. in the subsequent decade, as has before been observed, marks a period of renewed industrial activity. The influence of the War of the Rebellion is undoubtedly

seen in the small percentage of increase (5.92 per cent.) from 1860 to 1865, while in the five years ending in 1880 the depression of business that terminated about that period left its impress in the small gain of 7.08 per cent. shown by the census of that year, as compared with the gain of 18.81 per cent. from 1870 to 1875, and of 10.04 per cent. from 1880 to 1885.

It has been shown that from 1781 to 1860 only two important changes were made in the civil divisions of the State, that of the organization of the town of Burrillville from Glocester in 1806, and the formation of Fall River from Tiverton in 1856. This period of over three-quarters of a century witnessed the transformation of the people of the State from a community depending upon commerce, farming, and fishing as livelihoods, to one in which manufacturing became the chief source of material prosperity and support. The following table, showing the increase of population in the several civil divisions of the State during that period, will be of interest:

COUNTIES, CITIES, AND TOWNS.	1782.	1860.	Increase or Decrease.	Per cent.
THE STATE.....	52,347	174,620	122,273	233.58

Westerly.....	1,720	3,470	1,750	101.74

† Includes Burrillville, 4,140.

From 1860 to 1895 the total population of the State increased 210,138, or 120.34 per cent. During this period, however, nine towns, West Greenwich, Little Compton, New Shoreham, Portsmouth, Foster, Glocester, Scituate, Exeter, and Hopkinton, decreased in population, and the town of Charlestown added only three to its population.

TOWNS.	1860.	1895.	Decrease.	Per- centage.
West Greenwich.....	1,258	721	537	42.69
Little Compton.....	1,304	1,112	192	14.72

Exeter.....	1,741	917	824	47.33
Hopkinton.....	2,738	2,713	25	.91
Total.....	19,022	14,948	4,074	21.42

The towns of West Greenwich, Foster, and Exeter, have given no signs of revival during this period. Little Compton, after falling to 1,156 in 1875, increased to 1,202 under the census of 1880. New Shoreham fell to 1,113 in 1870, but in 1890 had exactly the same population as in 1860. Portsmouth has had a varied experience. In 1865 it had 2,153 inhabitants, in 1875 this decreased to 1,893, but in 1885 it had a population of 2,008. Gloucester showed a slight increase between 1865 and 1870, between 1875 and 1880, and between 1885 and 1890. Scituate gained in population between 1865 and 1875, and between 1890 and 1895. These towns are all agricultural communities, although some of them have slight manufacturing interests. Warwick, the center of manufacturing on the Pawtuxet river, shows an increase of 137.42 per cent. during the period under consideration, and the gain of the city of Newport is 104.96 per cent., both due to widely varying causes; in the case of the former, the development of manufacturing, and in case of the latter, the growing popularity of the city as a summer resort. The city of Providence increased from 50,666 in 1860 to 145,472 in 1895, or 187.12 per cent. Part of this increase is due to the annexation to the city of portions of Cranston and North Providence.

It may be well to refer here to occasional exceptions that have been made to the results of the enumeration of the city of Providence and the town of Warren. The superintendent has no reason to doubt the completeness and accuracy of the count in both places. Unusual care was taken with the enumeration of Providence. The final count of that city was delayed several months to enable the enumeration of families who were absent from the city on June 1st. Some districts of the city where the first count seemed doubtful were reviewed again by special agents, and in most instances the first enumeration was shown to be satisfactory. The total population of the city is found to be 145,472, a gain of 13,326 since 1890, and of 27,402 since 1885. The gain of the city in population during the last decade is 23.21 per cent., slightly below the percentage gain of 26.45 for the whole State, and does not seem to compare favorably with the increase of 42.22 per cent. of Pawtucket and 51.05 per cent. of Woonsocket. But in the consideration of this matter the great development of cheap and rapid transit during the decade must be kept in mind. Electricity now makes it possible to reach the limits of the city of Providence, from its center, within 20 or 25 minutes. This

has resulted in the distribution of the population among the towns adjoining the city, where lands and rents are cheaper. Hence it is found that Warwick shows a gain of 59.33 per cent. in population during the decade; Cranston, 76.10 per cent.; Johnston, 54.01 per cent.; North Providence, 64.88 per cent.; and East Providence, 49.21 per cent. Table III shows that between 1875 and 1885 there were the following percentages of increase in the population of those towns: Warwick, 14.40 per cent.; Cranston, 5.57 per cent.; East Providence, 57.20 per cent.; Johnston, 45.51 per cent.; North Providence, 13.43 per cent. If the total population of those towns in 1885 and in this census is added to that of the city of Providence, the result will be found to be a gain in population of 57,767, or 32.85 per cent.; greatly above the percentage of increase for the whole State. The population of the city of Pawtucket is placed in this total, as it is well known that a large number of residents of that city either work or transact their business in Providence. It does not follow, of course, that the entire gain of these towns adjacent to Providence during the decade is due to migration from that city.

CITIES AND TOWNS.	1885	1895
Providence.....	118,070	145,472
Pawtucket.....	22,906	32,577
Warwick.....	13,286	21,168
Cranston.....	6,005	10,575
East Providence.....	6,816	10,170
Johnston.....	7,274	11,203
North Providence.....	1,478	2,437
Total.....	175,835	233,602

In regard to the town of Warren, which shows a decrease of 383, or 9.10 per cent., compared with the census of 1885, it can only be said that the enumerators who took this census of that town were above the average in ability and intelligence of those employed throughout the State. At the request of several citizens of Warren the superintendent was prepared to make another enumeration, but before arrangements for this could be completed one of the mills was destroyed by fire and a number of the families who depended upon its operations for their livelihood were

scattered. Reference to Table I and II will show that the increase in this town from 1875 to 1890 was only 484, or 12.08 per cent., while during that period the increase for the whole State was 87,267, or 33.79 per cent.

Table III shows the total population in 1875, 1885 and 1895, with the number and percentage of increase or decrease during each period of ten years. Comparisons have not been possible of the wards of the cities of Central Falls, Newport, Providence, and Woonsocket. The city of Woonsocket has been incorporated and the boundary lines of the wards of the cities of Providence and Newport have been changed since the census of 1885. Central Falls was set off from the town of Lincoln during 1895 and incorporated as a city. This change has greatly reduced the population of Lincoln, but it will be found that the population of the territory included in that town in 1885 has increased 40.33 per cent. Cranston has also suffered a slight loss of territory since the last census.

Nineteen towns and four cities have increased in population since 1885. This increase has been greatest in localities that are centers of manufacture, or are adjacent to the bay and possess natural attractions which make them particularly desirable as places of residence. The greatest percentage of increase since 1885 is shown by the town of Cranston, that of 76.10 per cent. Twelve towns, exclusive of Lincoln, show a decrease since 1885. Of these towns, Charlestown, Exeter, Foster, Glocester, Scituate, Smithfield, and West Greenwich were diminishing in population when the census of 1885 was taken. The other towns now diminishing in population are Hopkinton, North Smithfield, Portsmouth, Richmond, and Warren.

Bristol, Burrillville, East Greenwich, and Little Compton, which in 1885 were shown to be diminishing in population, now give evidence of renewed growth. It will be observed that the towns showing a decrease in population are, with two exceptions, interior localities, where the people are engaged chiefly in agriculture. The interest now shown in better highways, and the assistance rendered by the State in the improvement of the roads, may have a beneficial effect upon the fortunes of these declining communities, which will be looked for in the figures of the next census.

POPULATION BY SEX.

Tables IV and V treat of the population by sex, showing the number of males and females to the total population and the increase or decrease of each sex in the several civil divisions during the decade. While there are 9,578 more females than males in the State, there are towns and wards of cities in which the males exceed the females in number. The town of Barrington has 138 more males than females; West Greenwich, 81; Middletown, 95; New Shoreham, 66; Portsmouth, 137; Tiverton, 94; Cranston, 615; Glocester, 39; North Smithfield, 18; Charlestown, 52; Exeter, 47; North Kingstown, 73; Richmond, 28; Westerly, 66. It will be seen that the agricultural communities again present a peculiarity in contrast with the rest of the State, although, in certain of these towns, the excess of males can be explained by a particular industry carried on therein, as the brick-yards in the town of Barrington, the granite works in Westerly, and, in like manner, the penal and charitable institutions in Cranston are largely responsible for the excess of the male population in that town.

In 1865 the towns showing an excess of males were Barrington, West Greenwich, Jamestown, Middletown, New Shoreham, Portsmouth, Cranston, Glocester, and Exeter. In 1875, Tiverton, Burrillville, East Providence, Foster, Johnston, Charlestown, and Westerly were added to the foregoing list, and in Barrington and West Greenwich the females were in excess of the males. In 1885, Barrington, West Greenwich, Middletown, New Shoreham, Portsmouth, Burrillville, Cranston, Foster, Glocester, Charlestown, and Exeter showed an excess of males.

A peculiar feature is presented by the town of Foster, which, in 1885, had an excess of one male, and now has an equal number of both sexes.

The changes in the ratio of the sexes during the past thirty years may be seen from the following comparison :

CENSUS.	Excess of Females.	PERCENTAGE TO THE TOTAL POPULATION.	
		Males.	Females.
1865.....	8,439	47.72	52.28
1875.....	7,119	48.62	51.38
1885.....	11,498	48.11	51.89
1895.....	9,578	48.76	51.24

Warren shows the largest percentage of females, having of that sex 53.21 per cent. of its population, and Barrington the smallest with 45.86 per cent. of the population. Washington county is distinguished for the fact that in five of its seven towns the males predominate, and that the county, as a whole, for the first time under recent censuses has more males than females.

From Table V, giving the number and percentage of increase of the sexes, it will be found that of the twelve towns that decreased in population during the decade, in eight the numerical decrease has been greater among the females than among the males. In Smithfield there has been an increase of eight males and a decrease of nine females. In Jamestown, Burrillville, Cumberland, East Providence, North Providence, Pawtucket, and Woonsocket, the numerical increase has been greater among the females than among the males.

FAMILIES AND DWELLINGS.

Tables VI to XVIII, inclusive, present statistics regarding families and dwellings. Under this census the enumeration of dwelling-houses was more specific than ever before. Information was obtained that permitted a classification of residences as single dwelling-houses or tenements, and enabled a presentation of the sizes of all houses by stories, the number of residences under construction, and the number of families occupying a specified number of rooms. It should be explained that for census purposes "a family" signifies a man or a woman living alone, or a number of persons of one or both sexes living together. Hotels, hospitals, prisons, asylums, boarding-houses, colleges and boarding-schools form but one family having a common roof and table.

The inclusion of such institutions renders it necessary to divide the families into what is known as the "normal" and "abnormal," the latter class including all public and private institutions of more than twelve persons.

A dwelling-house, for census purposes, means any building or place of abode having an independent entrance upon the street. A large tenement house, containing forty families, with one entrance, would be considered as only one house, so also would a hotel, boarding-school, dormitory, or any other large building used for residential purposes. A small tenement house with two or three families, would be considered as one house. A building under one roof, suited for two or more families, but with a dividing partition wall and a separate front door for each part of the building, is considered as two houses.

The essential facts in regard to families and dwellings for the entire State, obtained from the last four censuses, are arranged in the following comparative table:

CENSUS.	Number of Families.	Average Size of Family.	Dwellings Occupied.	DWELLINGS UNOCCUPIED.	
		Persons.		Number.	Per cent. of Total Dwellings.
1865.....	39,208	4.72	27,740	926	3.23
1875.....	55,245	4.67	37,512	1,363	3.51
1885.....	66,610	4.57	46,333	2,194	4.52
1895.....	84,880	4.53	58,471	4,295	6.84

CENSUS.	Persons to a Dwelling Occupied.	Families to a Dwelling Occupied.	WOODEN DWELLINGS.	
			Number.	Per cent. of Total Dwellings.
1865.....	6.67	1.41	27,959	97.53
1875.....	6.88	1.42	37,830	97.31
1885.....	6.56	1.44	47,135	97.13
1895.....	6.57	1.45	60,913	97.05

It will be seen from this table that during the last thirty years there has been little change either in regard to size of families or character of dwellings. The proportion of wooden houses to the total number of residences has decreased slightly. The proportion of unoccupied houses in this census is unusually large; 6.84 per cent. if houses under construction are considered, and 6.30 per cent. without. Manifestly this supports the theory of migration from the State on account of the industrial depression.

Of the 84,880 families in the State, 13,786 have female heads, or one in six families. The extremes of this are met with in the town of Exeter and the city of Newport. In the town of Exeter the family with a female head is one in thirteen, in the city of Newport, one in five; the latter condition being due, no doubt, to the large number of boarding-houses. The increase in the total number of families during the decade is 27.43 per cent.; in those with male heads, 27.30 per cent., and with female heads, 28.08 per cent.

The following table will show the percentage of families of specified sizes to the total number of families in 1885 and in this census, and indicate the changes in the ratios that have taken place during the decade:

FAMILIES OF	1895.		1885.	
	Number.	Per cent.	Number.	Per cent.
One person.....	3,353	3.95	2,751	4.13
Two persons.....	14,688	17.30	11,307	16.97
Three persons.....	16,326	19.23	12,809	19.23
Four persons.....	15,230	17.94	11,557	17.35
Five persons.....	11,760	13.86	9,438	14.17
Six persons.....	8,570	10.10	6,736	10.11
Seven persons.....	5,761	6.79	4,624	6.94
Eight persons.....	3,786	4.46	2,988	4.49
Nine or more persons.....	5,406	6.37	4,400	6.61
Total families.....	84,880	100.00	66,610	100.00

In 1885, families of twelve persons and fewer embraced 96.05 per cent. of the total population. In this census they contained 96.19 per cent. of the total population.

There is an increase of 18,270 families, or 27.43 per cent. during the last decade, as against 11,365, or 20.57 per cent. from 1875 to 1885. This percentage of increase is exceeded in Kent and Providence counties, the manufacturing sections of the State, and is less in Bristol, Newport and Washington counties. In 1885 the percentage of increase shown during the decade for the whole State was exceeded in Newport and Providence county, and was less in Bristol, Kent and Washington.

The towns and cities that show during the last decade an increase above the average for the whole State are as follows :

CITIES AND TOWNS.	Increase in Number of Families.	Percentage of Increase.
Warwick.....	1,552	54.06
Jamestown.....	65	53.28
Cranston.....	949	85.50
East Providence.....	867	57.65
Johnston.....	962	59.94
North Providence.....	162	51.27
Pawtucket.....	2,120	42.76
Woonsocket.....	1,595	49.60

An examination of the number and size of families in towns showing a decrease in population during the decade leads to the

conclusion that the falling off in population may be due to the migration of members of families, probably the younger ones, as shown in the following tables :

TOWNS.	Decrease in Population.	Decrease or Increase in Number of Families.	Persons to a Family, 1885.	Persons to a Family, 1895.
Warren	383	-43	4.52	4.37
West Greenwich.....	142	-41	3.82	3.90
Portsmouth	175	+4	4.22	4.23
Foster.	207	-29	3.55	3.26
Glocester.....	289	-45	3.76	3.52
North Smithfield.....	251	-7	5.00	4.75
Scituate.	77	-	3.89	3.77
Smithfield.	1	+19	4.28	4.02
Charlestown.	58	-4	4.05	3.89
Exeter.	169	-39	3.68	3.58
Hopkinton.	83	+28	3.84	3.56
Richmond.	88	+7	4.08	3.79

In some of the towns, like Portsmouth, Smithfield, Hopkinton, and Richmond, there has been a decrease in population and an increase in the number of families. Table XI, showing the number of families occupying a specified number of rooms, has not been given in a previous State census. A majority of the families in the State live in from one to six rooms, and 17,128, or 20.18 per cent. of the total number of families, live in six rooms. The figures by counties show that, with the exception of Bristol county, more families live in six rooms than in any other size of dwelling. In Bristol county the five-room residence appears to be most popular. This is also true of the city of Central Falls, Lincoln, and North Providence.

It has been shown that the average number of persons to a dwelling for the State is 6.58, and the average number of families to a dwelling is 1.45. The extremes are found in West Greenwich, with 3.90 persons to a dwelling, and one family to a dwelling; and the fourth ward of Central Falls, with 11.93 persons to a dwelling, and 2.13 families.

Taking the total number of rooms occupied in the State as 563,013, a number that is obtained by using 15 rooms as the average for families occupying 13 rooms and over, it will be found that each family occupies 6.63 rooms, and each person 1.46

rooms. In West Greenwich there are 1,270 rooms reported as occupied, making 6.86 rooms for each family, and 1.76 rooms for each person. In the fourth ward of Central Falls the number of rooms occupied is 3,599, making 4.98 rooms for each family, and .92 rooms for each person, or two persons to 1.84 rooms. This does not denote a very overcrowded condition, considering that Rhode Island is the most densely populated state in the Union.

In the city of Providence there are 208,163 rooms occupied, making 6.36 rooms for each family, and 1.43 rooms for each person.

Of the 58,471 dwellings occupied, 35,307 are single dwellings and the rest tenement houses. Of the single dwellings, 20,253 are one and a half stories, and of the tenement houses, 15,664 are two and a half stories. There are more single dwellings than tenement houses in all the civil divisions of the State, with the exception of the cities of Providence, Pawtucket, Central Falls, and Woonsocket. The number of single dwellings in those four cities is 12,645 compared with 16,022 tenement houses. Of the 62,766 dwellings in the State, only 1,853 have brick or stone entering into their construction. Of this number, 1,492 are found in Providence county, made up of 792 in Providence, 42 in Pawtucket, 174 in Woonsocket, and 40 in Central Falls.

Of the 362 dwellings under construction at the time the census was taken, 261 are found in Providence county, and of that number 216 are credited to the city of Providence and the towns and city adjoining. Of these 216 dwellings, 128 are two and a half stories in height. Outside of the cities most of the houses under construction are one and a half stories in height.

Table XVIII, showing the number of dwellings occupied in 1875, 1885, and 1895, and the percentage of increase or decrease in the two decades, reveals apparent inconsistencies. This is no doubt due to difference in the judgment of enumerators under the several other censuses. Dwellings that are reported as a tenement house under one census, might be returned as two or three houses under another, but the instructions given enumerators under the 1895 census have been so explicit that the statistics for that year should form a just basis for future comparisons.

In connection with this subject it is proper to refer to the table showing the relation to the heads of families of other members of the families. For census purposes, in a normal family,

that is, one consisting of husband and wife, children and servants, the husband, or the male, is considered the head. But all the heads of families are not males. There are families which are managed and directed by a widowed mother, or by a sister, and institutions in which a matron is at the head of the household. In such cases the head of the family would, of course, be a female. The meaning of the term "family," as used in the census, is an arbitrary one. Its central idea, as before explained, is not blood or legal relationship, but rather the gathering of a number of persons under one roof, or around a common table; hence, a family may consist of one person or of a score or more persons residing in a boarding-house or institution.

The relationships of Table XLV are a peculiar combination formed by blood, law, residence, or employment, and the figures in no way attempt to cover the question of blood relationship. It could not be otherwise, for there are not a few instances where a man and his wife live with his or her father or mother, and in such a case they would be classified as son and daughter, respectively, to the head of the household, and not as husband and wife, because the latter relationship is not that which they bear to the head. Under the same rule a man and his wife, residing in a boarding-house, would be classified as boarders. The term "patients," used in this table, embraces all those who were found in public or private institutions receiving treatment at the time the census was taken. "Inmates" include all those who were found in charitable or correctional institutions, except prisoners, who are given under a separate class. "Attendants" comprise all those in the service of such institutions. "Pupils and students" are those living away from home, and boarding under the care of the school or college in which they are receiving their education. "Servants and stewards," "hired men and boys," are employees of the head of the family.

An abstract was made in the census of 1885 of a similar table which reduced the relationship detail to seven classes, and for the purpose of comparison it is followed here. These seven classes are: Heads of families, wives, blood relatives, legal relatives, residential, employees, and other relationships.

It is perhaps necessary to explain two terms used in this classification, those of legal relatives, and blood relatives. Blood relatives include fathers, mothers, grandfathers, grandmothers, brothers, sisters, half-brothers and sisters, sons and daughters,

grandsons and daughters, uncles, nephews, aunts, nieces and cousins.

But all uncles, aunts, nephews, nieces and cousins given in this tabulation are not blood relatives, therefore the plan was adopted in 1885 of classifying half of them with legal relatives and half of them with blood relatives, and that has been carried out in this table. In an abstract form the table of relationship for this census is as follows :

RELATIONSHIP.	Males.	Females.	Both Sexes.
Total population.....	187,590	197,168	384,758
Heads of families.....	71,094	13,786	84,880
Wives.....	—	64,565	64,565
Blood relatives.....	88,579	93,306	181,885
Legal relatives.....	6,059	8,278	14,337
Residential.....	18,864	8,273	27,137
Employees.....	2,525	8,886	11,411
Other relationship.....	469	74	543

This is supplemented by a comparative table showing the percentage of each class of relationship in males and females, and both sexes, to the total population of each sex and both sexes :

RELATIONSHIP.	MALES.		FEMALES.		BOTH SEXES.	
	1895.	1885.	1895.	1885.	1895.	1885.
Heads of families.....	37.90	38.15	6.99	6.82	22.06	21.89
Wives.....		*.03	32.75	32.34	16.78	16.79
Blood relatives.....	47.22	47.75	47.32	47.04	47.27	47.38
Legal relatives.....	3.23	2.91	4.20	3.96	3.73	3.46
Residential.....	10.05	8.70	4.19	4.41	7.05	6.48
Employees.....	1.35	1.62	4.51	4.90	2.97	3.32
Other relationship.....	.25	.84	.04	.53	.14	.68

It may be remarked that the number of heads of families in the table of males is in excess of the number of wives reported in the family table. But it should not be forgotten that the term "head of family" does not necessarily mean a married person.

* Husbands.

It may include a single person living alone, a widower, or an unmarried brother or son who may be the main support of the rest of the family, and considered by them the head. Some idea of the married couples who are boarding may be obtained by the following calculation: There are 72,565 married males, and 72,023 married females in the State. These 72,023 married females may be taken to represent the number of married couples living together. The 64,565 wives reported in the family table of relationship may be taken to represent the number of married couples who are keeping house; from which the conclusion may be drawn that there are 7,458 married couples, or 10.36 per cent. of the total number, who are boarding or lodging.

AREA, AND DENSITY OF POPULATION.

The area of the State and of its civil divisions in square miles, together with the density of population, is presented in Table XIX. It will be noticed that the areas of the State and of many of its civil divisions differ from those used by the census of 1885. The total area of 1,085 square miles of land surface used in this census is that adopted by the national censuses of 1880 and 1890, from government surveys. The areas of the minor civil divisions were obtained by planimeter measurements based upon the topographical atlas prepared by the United States Geological Survey in 1891, which is the most correct authority on the subject to date.

There has been a peculiar lack of harmony in regard to the area of the State as presented in various censuses. The United States census of 1860 and 1870 gave the area as 1,306 square miles; those of 1880 and 1890 adopted 1,085 square miles as the area. The State censuses of 1865 and 1875 gave the area of the State as 1,054.6 square miles. In 1885 this was changed to 1,053.1, as the result of corrections made by the engineers of the cities of Providence, Pawtucket, and Newport, in the areas of those municipalities.

Taking the area 1,085 as a basis, the density of population, as shown by the last four State censuses, is as follows:

CENSUS.	Total population.	Number of persons to a square mile.
1865.....	184,965	170.47
1875.....	258,239	238.01
1885.....	304,284	280.45
1895.....	384,758	354.61

The density of population in this census runs from 14.10 persons to the square mile in the town of West Greenwich, to 24,910

persons to the square mile in the third ward of the city of Central Falls. It does not necessarily follow that the third ward of Central Falls is the most thickly settled portion of the State. It is believed that a portion of the tenth ward of Providence, in what is known as the mill district, is the most thickly settled section. But this ward is a large one, of 3.6 square miles, exceeded in area only by the fifth wards of the cities of Newport and Woonsocket, and the outlying unsettled districts reduce the density of its population to 5,839.4 per square mile. All of the cities and eight of the towns show a density of population greater than that of the whole State.

Rhode Island continues to enjoy the distinction of being the most densely populated state in the Union; the census of Massachusetts for 1895, indicating that the density of population for that State is 310.97 persons to the square mile.

Considering the towns that have diminished in population during the decade, it will be found that they represent an area of 480.1 square miles, or 44.25 per cent. of the total area of the State. These towns have an aggregate population of 24,165, or 50.33 persons to the square mile. Excluding this area from the total area of the State, the result is 604.9 square miles with a population of 360,593, or 596.12 persons to the square mile. If this density were true of the whole State, it would represent a population of 646,790 persons. Excluding Warren from the list of declining towns (which has an area of 6.5 square miles, and a population of 588.6 to the square mile), we have an area of 473.6 square miles, covered by a population of 20,339 persons, or 42.95 persons to a square mile. The eight towns of Bristol, Warren, Warwick, Cranston, East Providence, Johnston, Lincoln and North Providence, and the five cities that exceed in density of population the average for the State, comprise a population of 314,341 persons, or 81.70 per cent. of the total population of the State. They cover an area of 197.4 square miles, or 18.19 per cent. of the total area of the State, and the density of population of the territory covered by these civil divisions is 1,592.40 persons to the square mile.

The most densely populated city is Central Falls, with an area of 1.3 square miles and a population of 15,828, representing 12,175.4 persons to the square mile.

NATIVITY OF THE POPULATION AND PARENTAGE.

Tables XX and XXI treat of the general nativity of the population, showing the number of native and foreign born for the years 1885, 1890 and 1895, and the number of each class by sex, as well as the percentage to the total of each sex and to the total population.

It is interesting to note the changes that have taken place in the past 45 years in the ratio of native and foreign born to the total population. The United States census of 1850 presents the first figures available for comparison of the general nativity of the population :

CENSUS.	Native born.	Foreign born.	Percentage of native born to total population.
1850.....	123,643	23,902	83.80
1865.....	145,262	39,703	78.53
1875.....	186,609	71,630	72.26
1885.....	218,723	85,561	71.88
1895.....	261,983	122,775	68.09

During this period of 45 years the increase in the native born has been 138,340, or 111.89 per cent.; and in the foreign born, 98,873, or 413.66 per cent.

In 1885 there were 100 foreign born persons for every 256 native born; in 1890 there were 100 for every 225; and there are now 100 to every 213. As previously observed, between 1875 and 1885, the native born increased 17.21 per cent., and the foreign born, 19.45 per cent. The increase during the last decade has been of the native born, 19.78 per cent.; and of the foreign born, 43.49 per cent.

The following towns show a decrease in the native born popu-

lation during the decade: Warren, Coventry, West Greenwich, Little Compton, Portsmouth, Foster, Glocester, North Smithfield, Scituate, Smithfield, Charlestown, Exeter, Hopkinton, and Richmond. Only five towns show a decrease in foreign born population during the decade: those of Warren, West Greenwich, Glocester, North Smithfield, and Exeter. The following towns and cities have a greater percentage of foreign born to their total population than the percentage of 31.91 of the entire State: Warren, Warwick, Central Falls, Cumberland, Johnston, Lincoln, North Providence, North Smithfield, Pawtucket, and Woonsocket. These civil divisions have a population of 131,190, of which 52,833, or 40.27 per cent., are foreign born. The largest percentage of foreign born is found in the town of Lincoln, 50.29 per cent.; and the smallest in the town of Exeter, which contains just 13 persons of foreign birth, or 1.42 per cent. of the total population. Providence, which is below the average for the State in the percentage of foreign born, with 31.77 per cent., contains 37.89 per cent. of the native born population of the State, and 37.64 per cent. of the foreign born. Of the civil divisions having a large proportion of foreign born in the population, the town of Warwick shows the greatest percentage of increase in foreign born during the decade, with 4,352, or 111.13 per cent.

The towns of Coventry, Cumberland and South Kingstown show a decrease in foreign born since 1890, although an increase during the decade. Warren and North Smithfield increased in the foreign born population between 1885 and 1890, but the figures for those towns in that respect, under this census, fall below those of 1885.

Only five towns of the State show an increase during the decade in the percentage of native born to the total population:

TOWNS.	NATIVE BORN. Per cent. of Total Population.	
	1885.	1895.
Warren.....	65.45	65.63
East Providence.....	80.77	81.88
Glocester.....	85.22	89.22
North Smithfield.....	61.49	63.73
Exeter.....	97.97	98.58

These towns have a population of 19,372, of which 15,000, or 77.43 per cent are native born; in 1885 their population was 17,110, of which number 12,852, or 75.11 per cent., were native born.

Native born males exceed the females in Barrington, West Greenwich, Warwick, Middletown, New Shoreham, Portsmouth, Tiverton, Cranston, Glocester, Lincoln, North Smithfield, Charlestown, Exeter, Richmond, and South Kingstown. Foreign born males exceed the females in Barrington, Coventry, West Greenwich, Little Compton, Middletown, Portsmouth, Burrillville, Cranston, Foster, Glocester, Johnston, Charlestown, Exeter, Hopkinton, North Kingstown, Richmond, and Westerly. There are in the whole State 5,647 more native born females than males, and 3,931 more foreign born females than males.

The division of the town of Lincoln left that town with 48 more foreign born than native born in a total population of 8,350. It therefore has the distinction of being the only town in the State containing more foreign born than native born. Of the 24,178 persons in the town of Lincoln and the city of Central Falls, 11,669, or 48.26 per cent., are foreign born. Next in order is the city of Woonsocket, with a population containing 45.71 per cent. of foreign born. In the second, fourth, and fifth wards of Central Falls, and the fifth ward of Woonsocket, the foreign born exceed the native born.

Tables XXX, XXXI, XXXII, and XXXIII, give the place of birth of the native and foreign born by sex. This subject is covered in these tables in greater detail than in any previous census presentation. Of the 261,983 native born, 92.22 per cent. were born in New England, and 73.07 per cent. were born in Rhode Island. Of those born in Rhode Island, 71.30 per cent. were born in the town in which they now reside. In 1885, of the native born population, 92.68 per cent. were born in New England, and 73.21 in Rhode Island; and of the latter, 69.88 per cent. were born in the town in which they reside. In 1875 these ratios were 93.42, 72.35, and 63.26 per cent., respectively.

The following table, classifying the native born according to sections and principal States of their birth, will show the percentage of increase from each section since 1885:

PLACE OF BIRTH.	1885.	1895.	Increase.	Per cent.
Native born.....	218,723	261,983	43,260	19.78
New England	202,707	241,612	38,905	19.19
Rhode Island.....	160,136	191,434	31,298	19.54
Town of residence	111,905	136,488	24,583	21.97
Other towns in Rhode Island....	48,231	54,946	6,715	13.92
Massachusetts.....	26,366	29,957	3,591	13.62
Connecticut.....	9,029	11,555	2,526	27.98
Maine	3,331	3,835	504	15.13
New Hampshire	2,056	2,415	359	17.46
Vermont.....	1,789	2,416	627	35.05
Maryland.....	1,057	1,010	-47	-4.45
New York.....	7,658	9,365	1,707	22.29
Pennsylvania.....	1,563	2,074	511	32.69
Virginia.....	1,331	1,764	433	32.53
Ohio.....	376	521	145	38.56
New Jersey.....	1,156	1,368	212	18.34
Illinois	277	446	169	61.01
Other native born.....	2,598	3,823	1,225	47.15

Referring to the foregoing table it may be explained that under the term "town of residence" is given the number of persons residing in the several towns and cities in which they were born; and under the term "other towns" is given the number of natives of Rhode Island who reside in a town and city other than that in which they were born.

Compared with 1885, the following towns show a decrease in the number of residents who were born in said towns:

TOWNS.	1885.	1895.	Decrease.
Barrington.....	565	405	160
West Greenwich.....	429	351	78
Little Compton.....	646	624	22
New Shoreham	1,074	1,053	21
Foster	835	679	156
Glocester.....	869	806	63
Smithfield.....	840	716	124
Charlestown.....	474	377	97
Exeter	630	530	100
Hopkinton	1,212	1,149	63
Richmond.....	601	497	104

These figures represent an aggregate of 8,175 for 1885 and 7,187 for 1895, a decrease of 988, or 12.09 per cent., during the decade. Of these eleven towns, ten show a decrease of natives since 1885.

TOWNS.	1885.	1895.	Decrease or Increase.
Barrington.....	844	700	144
West Greenwich.....	1,267	1,090	177
Little Compton.....	840	803	37
New Shoreham.....	1,472	1,388	84
Foster.....	1,037	1,642	295
Glocester.....	1,869	1,799	70
Smithfield.....	3,878	2,885	993
Charlestown.....	1,121	940	181
Exeter.....	1,791	1,558	233
Hopkinton.....	1,927	1,988	+61
Richmond.....	1,535	1,469	66

These figures make an aggregate of 18,481 for 1885 and 16,262 for this census; showing a decrease of 2,219, or 12.01 per cent. during the decade, in persons living in various sections of the State but natives of the towns named.

To the above list must be added the following towns:

TOWNS.	1885.	1895.	Decrease.
Portsmouth.....	1,569	1,429	140
Tiverton.....	1,758	1,680	78
North Providence.....	1,201	1,164	37
Scituate.....	3,472	3,463	9
South Kingstown.....	5,211	5,196	15

Making in all a decrease of 2,498, or 7.88 per cent. during the decade, in the number of natives of the towns named.

Towns and cities showing by this census an increase of both natives and native residents are presented in the following table:

PLACE OF BIRTH.	1885.			1895.		
	Born in Town.	Residing in Town.	Residing in other Towns.	Born in Town.	Residing in Town.	Residing in other Towns.
Bristol	4,039	3,084	955	4,076	3,107	969
Warren.....	2,079	1,361	718	2,300	1,376	924
Coventry	3,354	1,651	1,703	3,467	1,658	1,809
East Greenwich.....	2,100	935	1,165	2,418	1,279	1,139
Warwick.....	7,296	4,272	3,024	9,333	6,174	3,159
Jamestown	320	205	115	376	269	107
Middletown.....	904	505	399	934	555	379
Newport.....	10,202	8,605	1,597	11,205	9,600	1,605
Burrillville.....	3,163	2,153	1,010	3,362	2,158	1,204
Cranston.....	3,146	1,257	1,889	3,829	1,869	1,960
Cumberland.....	3,467	1,778	1,689	3,693	1,959	1,734
East Providence.	1,722	1,403	319	2,885	2,265	570
Johnston.....	3,207	1,760	1,447	4,431	2,636	1,795
Lincoln.....	4,889	3,379	1,510	(a)9,263	(a)6,345	2,918
North Smithfield.....	668	460	208	1,216	746	470
Pawtucket.....	9,665	7,458	2,207	13,343	10,592	2,751
Providence.....	55,128	46,569	8,559	69,152	57,545	11,607
Woonsocket	6,169	4,932	1,237	9,050	7,424	1,626
North Kingstown.....	3,211	1,911	1,300	3,272	1,951	1,321
Westerly.....	3,026	2,363	663	3,517	2,711	806

(a) Includes Central Falls.

In a general way this table will show the migration from the town of birth to other towns during the decade. In the city of Providence, for instance, the census of 1885 reports 55,128 persons living in the State and born in Providence; by this census the number is 69,152, an increase of 25.44 per cent. In 1885, of the number given, 8,559 were living outside the city; by this census it is 11,607, an increase of 35.61 per cent. This sustains the theory that the city of Providence has suffered in population from the development of its suburbs by rapid transit. This is surely demonstrated by the following comparison of the number of natives of Providence residing in adjacent towns in 1885 and in this census:

TOWNS.	1885.	1895.
Cranston.....	1,044	1,727
East Providence.....	1,445	2,086
Johnston.....	964	1,480
North Providence.....	191	345
Pawtucket.....	1,185	1,577
Warwick.....	829	1,062

Showing a total of 5,658 in 1885, and under this census of 8,277, or an increase of 46.29 per cent., during the decade. This increase of 2,619 is 85.92 per cent of the total increase of natives of Providence living in other sections of the State.

The following table shows the percentage of natives of each county residing in the State to the total population of native Rhode Islanders, according to this census and that of 1885:

COUNTIES.	1885.	1895.
Bristol.....	4.35	3.70
Kent.....	8.75	8.52
Newport.....	10.66	9.30
Providence.....	64.68	68.50
Washington.....	11.13	9.37
Rhode Island, not specified.....	.43	.61

Referring to the tables giving in detail the country of birth, it will be noticed that the natives of Newfoundland are included in the figures for Canada. The term "Canada French" embraces all persons born in Canada of French extraction.

The principal nationalities comprising the foreign born population during the four State census periods, the increase and percentage of increase during the last decade, are presented in the following table:

COUNTRY OF BIRTH.	1865.	1875.	1885.	1895.	Increase or Decrease in last Decade.	Per cent. of Increase.
Canada.....	3,384	13,687	18,584	33,056	14,472	77.87
England.....	6,478	12,739	16,784	22,820	6,036	35.96
Ireland.....	27,030	37,286	38,895	38,226	-669	-1.72
Scotland and Wales.....	1,403	3,186	3,872	5,900	2,028	52.38
Sweden.....	28	809	1,696	5,112	3,416	201.42
Germany.....	897	2,013	2,614	4,126	1,512	57.84
Italy.....	37	231	760	5,717	4,957	652.24
Russia.....	13	92	295	2,284	1,989	674.24
France.....	146	401	424	683	259	61.08
Portugal.....	75	571	814	2,241	1,427	175.31
Turkey.....	—	7	2	314	312	15,600.00
West Indies.....	47	88	81	111	30	37.04
Austria.....	1	22	111	513	402	362.16
Belgium.....	2	28	38	412	374	984.21
Denmark.....	14	46	67	231	164	244.78

Of the 37,214 increase in the foreign born, 38.89 per cent. are Canadians, and over one-half are natives of the British empire.

The increase in natives of Canada, England, Scotland, Wales, Sweden, Germany, Italy, Russia, and Portugal, comprises 96.30 per cent. of the total increase in the foreign born population of the State.

The Canadians have now almost reached the Irish in numerical strength. In 1885 the Canadians formed 21.72 per cent. of the foreign born; the English, 19.62 per cent; and the Irish, 45.46 per cent. In this census the Canadians form 26.92 per cent; the English, 18.59 per cent; and the Irish, 31.14 per cent.

The increase in the Canadians has been chiefly in Woonsocket, Providence, Pawtucket, Central Falls, Warwick, Lincoln, Burrillville, and Cumberland. The gain in the English has been distributed chiefly in Providence, Pawtucket, Central Falls, Woonsocket, Johnston, Cumberland, Cranston, and Warwick. The Swedes have increased the population of Providence, Pawtucket, Newport, Warwick, Cranston, East Greenwich, and East Providence. Germans are to be found in Providence, Pawtucket, Central Falls, Lincoln, Johnston, North Providence, Newport, Cranston, and Warwick. The Italians are to be found in large colonies in Providence, Pawtucket, Newport, Barrington, Bristol,

Warwick, Cranston, North Providence, Johnston, Westerly, and North Kingstown. Portuguese are found chiefly in Newport county, and in Bristol, Warren, Warwick, Cranston, East Providence, North Smithfield, and Providence. Russians and Turks (principally Armenians) are located chiefly in the city of Providence.

French Canadians exceed those of any other foreign nationality in Warren, Coventry, Warwick, West Greenwich, Burrillville, Central Falls, Glocester, Lincoln, North Providence, North Smithfield, Scituate, Smithfield, Woonsocket, and Exeter; English Canadians in Foster. Irish exceed those of any other foreign nationality in Bristol, Jamestown, Newport, Cranston, East Providence, Pawtucket, Providence, South Kingstown. English exceed those of any other foreign nationality in Cumberland, Johnston, Charlestown, Hopkinton, Richmond, New Shoreham, and Tiverton. The Italians exceed those of any other foreign nationality in Barrington and North Kingstown; the Swedes, in East Greenwich; the Portuguese, in Little Compton, Middletown, and Portsmouth; and the Scotch in Westerly.

Tables XXXIV and XXXV, dealing with the nativity of the parents of the population, show more prominently how largely the increase of the population is due to foreign blood within the past generation.

Examining the tables according to the birthplace of father, it is seen that 157,238, or 40.87 per cent., were born of native fathers, and 227,520 were born of foreign fathers. Parents of unknown birth, for the purpose of analysis, are classed with the foreign born, which they undoubtedly are in most instances.

Since 1865 the ratio of persons born of native and foreign fathers to the total population has been as follows:

1865.

Native fathers	117,316, or 63.43 per cent.
Foreign fathers.....	67,649, or 36.57 per cent.

1875.

Native fathers	134,722, or 52.17 per cent.
Foreign fathers.....	123,517, or 47.83 per cent.

1885.

Native fathers	144,922, or 47.63 per cent.
Foreign fathers.....	159,362, or 52.37 per cent.

1895.

Native fathers	157,238, or 40.87 per cent.
Foreign fathers.....	227,520, or 59.13 per cent.

Classified by general nativity, and foreign, native and mixed parentage, the result for this census is :

PARENTAGE.	Native born.	Per cent. of total native born.	Foreign born.	Per cent. of total foreign born.
Total.....	261,983	—	122,775	—
Both parents native	143,610	54.82	—	—
Both parents foreign	89,190	34.04	122,472	99.75
Mixed parentage	29,183	11.14	303	.25

This classification shows that 34.04 per cent. of the native born population are of foreign parents, and 11.14 per cent. have one parent native and the other foreign.

The statistics for 1885 make the following presentation of a similar classification :

PARENTAGE.	Native born.	Per cent. of total native born.	Foreign born.	Per cent. of total foreign born.
Total.....	218,723	—	85,561	—
Both parents native	136,963	62.62	—	—
Both parents foreign.....	64,292	29.39	85,369	99.78
Mixed parentage	17,468	7.99	192	.22

PARENTAGE.	1885.		1895.	
	Total population.	Per cent. of total population.	Total population.	Per cent. of total population.
Both parents native.....	136,963	45.01	143,610	37.33
Both parents foreign.....	149,661	49.19	211,662	55.01
Mixed parentage.....	17,660	5.80	29,486	7.66
Total population.....	304,284	—	384,758	—

During the last decade the population born of native fathers has increased 8.50 per cent., and those of foreign fathers, 42.77 per cent. From 1875 to 1885 the increase in persons born of native fathers was 7.57 per cent., and of foreign fathers, 29.02 per cent.

The following tables form an abstract of the parent nativity presentation, and show the nativity of parents by three divisions in the native born parents, and by the principal nationalities in the foreign born parents. As in the presentation of parent nativity in detail for the State, the "unknown" and "at sea" are included in the term "other countries." Russia includes Finland and Poland; and Portugal includes the Cape Verde and Western Islands:

NATIVE PARENTAGE.

* Includes Canada English.

† Includes Canada French.

From the foregoing may be obtained the following presentation, showing the number of persons having either both parents or one

born in specified sections of the United States, and in the foreign countries from which the foreign born of the population principally come :

NUMBER OF PERSONS HAVING EITHER ONE OR BOTH PARENTS
BORN IN :

Rhode Island.....	111,189
New England.....	68,008
Other United States.....	27,372
Canada French.....	45,122
Canada English.....	12,750
Ireland.....	100,545
England.....	43,858
Scotland and Wales.....	13,081
Germany.....	9,258
Italy.....	7,711
Sweden.....	7,394

That is to say, there are 111,189 persons who have in their veins the blood of a Rhode Island born parent, either on the father's or mother's side or through both parents.

There is also to be obtained the following table, showing the number of fathers and mothers born in three sections of the United States, and in the principal foreign countries :

FATHERS AND MOTHERS—NATIVE, AND PRINCIPAL FOREIGN NATIONALITIES.

PLACE OF BIRTH OF PARENT.	Fathers.	Mothers.
Rhode Island.....	89,643	89,570
New England.....	48,717	49,919
Other United States.....	18,878	19,979
Canada French.....	42,952	42,401
Canada English.....	8,907	10,087
Ireland.....	91,441	91,985
England.....	37,769	36,469
Scotland and Wales.....	10,425	10,327
Germany.....	8,632	7,653
Sweden.....	7,180	7,129
Italy.....	7,678	7,423

Of the total population, 157,238 have native fathers, and 159,468 have native mothers; 227,520 have foreign fathers, and 225,290 have foreign mothers.

In regard to the subject of intermarriages, the tables show that the native born unite themselves principally with English-speaking people and Germans. There are 5,188 persons of native fathers and Irish mothers, and 5,333 of Irish fathers and native mothers; 3,249 of native fathers and English mothers, and 3,869 of English fathers and native mothers. There are 2,046 of native fathers and Canadian English mothers, and 1,426 of Canadian English fathers and native mothers. While the number of persons of Canadian French fathers or mothers is nearly four times that of those from Canadian English, there are only 1,509 persons with native fathers and Canadian French mothers, and 2,300 persons with Canadian French fathers and native mothers. The Canadian French parents, considering the large numbers of that nationality in the total population, have very few intermarriages with other nationalities. The English speaking races, generally, such as Canadian English, Irish, English, Scotch, and Welsh, intermarry. There are a large number of Germans married to Irish and English, and a smaller number to French and Swiss. The Portuguese, Swedes, Italians, and Russians marry generally with persons of their own nationality.

The extremes in regard to general nativity of parents are to be met with in the towns of Exeter and Lincoln. In Exeter, 95.20 per cent. of the total population is of native parents; 2.51 per cent. of foreign parents; and 2.29 per cent. of mixed parentage. In Lincoln, 15.09 per cent. of the total population is of native parents; 77.39 per cent. of foreign parents; and 7.52 per cent. of mixed parentage.

These tables in regard to place of birth of the population and the parents of the population are perhaps the most interesting and valuable of any portion of the census work. Much care has been given to their preparation, and they have been presented in such detail as to be of service to the statistician and student, who, interested in a particular nationality of a certain section of the State, will be able to carry the investigation of the subject much further than time would permit in this work.

It should be explained in regard to the parent nativity tables, that the term "other countries" means countries other than the United States, in fact, "foreign countries." In the tables for the State and counties its meaning, on account of the detail given, is restricted to "foreign countries other than those mentioned."

AGE.

The ages of the population of the State are given in detail from one month to 104 years, by sex and general nativity, in Table XXII.

In view, however, of the well known tendency of people to state ages in a general way, as, for instance, one year of age when it should be nine months, or 35 or 40 years when it should be 38 or 42 years, it will be more satisfactory to consider the population of the State by age periods rather than by the detail. This tendency is not so apparent in this census as in previous ones, but the large figures given for the ages marked by decades and half decades indicate that it does exist. It may also be found in the figures for children of one year of age and under. The total of 7,440 children reported under one year of age shows an increase during the decade of 1,375, or only 22.67 per cent., which is far below the percentage of increase for the total population. But if the number reported at one year of age be added, a total of 12,788 children is secured, an increase of 2,756 during the decade, or 27.47 per cent., which is a greater percentage of increase than the 26.45 per cent. of the total population. The proportion of children one year of age and under to the total population is one in 30.09 persons; in 1885 it was one in 30.33 persons. The proportion varies according to the strength of the foreign born in the population of the town or cities. West Greenwich, with a population 96.53 per cent. of which is native born, has of children one year of age and under, one in 36.05 persons; in 1885, it had one in 31.96; figures which give no promise that the town will increase in population during the decade. Anticipating the objection that a town diminishing in population is not one that should be used for such a comparison, the thriving town of East Providence may be taken, with a population 81.88 per cent. of which is native born. Of children one year of age and under, it has one in 30.18 persons. On the other hand, the city of Woonsocket, which has a population of 45.71 per cent. foreign

born, has one in every 24.92 *persons; and the city of Central Falls, with a population of 47.19 per cent. foreign born, has one in 22.11 persons; and the town of Warwick, with a population 39.06 per cent. foreign born, has one in 26.13 persons. The second ward of Central Falls, with a population 55.95 per cent. foreign born, has one in every 18.77; and the fifth ward, with a population 54.46 per cent. foreign born, has one in 21.53; the fifth ward of Woonsocket, with a population of 53.24 per cent. foreign born, has one in 20.76 persons.

The population by age periods will be found in Tables XXV, XXVI, XXVIII and XXIX, XLVI and XLVII. In Table XXV, sex, general nativity, color and race, are given by age periods. Table XXVI presents the total population for the State, counties, cities and towns by age periods. In Table XXVIII the conjugal condition is presented by age periods. In Table XXIX the conjugal condition by color, race, general nativity, and sex is given by age periods. Table XLVI shows the population by dependent, productive, and aged periods, and Table XLVII, by school, military and voting age.

The following table shows the ratio of population of the several age periods to the total population of the State for the last three State censuses :

AGE PERIODS.	Population, 1895.	Ratio, 1895.	Ratio, 1885.	Ratio, 1875.
Under 5 years.....	37,214	9.67	9.41	10.74
5 to 9 years.....	35,674	9.27	9.66	9.83
10 to 14 years.....	32,986	8.57	9.36	8.90
15 to 19 years.....	37,059	9.63	10.00	10.34
20 to 29 years.....	78,705	20.46	19.21	19.93
30 to 39 years.....	59,324	15.39	14.76	14.62
40 to 49 years.....	44,040	11.45	11.58	10.88
50 to 59 years.....	30,594	7.95	7.82	7.42
60 to 69 years.....	18,154	4.72	5.04	4.58
70 to 79 years.....	8,522	2.22	2.40	2.13
80 to 89 years.....	2,355	.61	.68	.57
90 and over.....	231	.06	.08	.06

Of the total population, 78,705, or 20.46 per cent., are between the ages of 20 to 29, inclusive, the largest number in any age period given. In the 35 years represented between 15 years and 49 years are found 219,028, or 56.93 per cent. of the population of

the State. Compared with 1885, the population of the State has advanced materially in the age periods of under 5 years, from 20 to 39 years, from 50 to 59 years. The percentage of increase of the total population of the State during the decade is 26.45 per cent.; but in the class under 5 years the gain is 8,567, or 29.91 per cent.; from 20 to 29 years, 20,237, or 34.61 per cent.; from 30 to 39 years, 14,322, or 31.90 per cent.; and from 50 to 59 years it is 6,807, or 28.62 per cent. In 1885 the population between 15 and 49 represented 55.55 per cent. of the total population; in this census the same ages embrace 56.93 per cent.

The following table shows the population of the State by age periods, sex, and general nativity, and the ratio of each age period to the total population of each class:

AGE PERIODS.	MALES.				FEMALES.			
	Native Born Population.	Per cent.	Foreign Born Population.	Per cent.	Native Born Population.	Per cent.	Foreign Born Population.	Per cent.
Total	128,168	—	59,422	—	133,815	—	63,353	—
Under 1 year	3,703	2.89	48	.08	3,649	2.73	40	.06
1 to 4 years	14,329	11.18	599	1.01	14,227	10.63	619	.98
5 to 9 years	15,722	12.27	2,079	3.50	15,791	11.80	2,082	3.29
10 to 14 years	13,660	10.66	3,034	5.11	13,375	10.00	2,917	4.60
15 to 19 years	13,166	10.27	4,785	8.05	13,650	10.20	5,458	8.62
20 to 29 years	23,039	17.97	14,778	24.87	24,508	18.61	15,980	25.22
30 to 39 years	16,278	12.70	12,847	21.62	17,433	13.03	12,666	19.99
40 to 49 years	11,967	9.34	9,558	16.08	12,445	9.30	10,070	15.90
50 to 59 years	7,877	6.14	6,807	11.46	8,332	6.23	7,578	11.96
60 to 79 years	7,661	5.98	4,637	7.80	8,784	6.56	5,594	8.83
80 and over	766	.60	250	.42	1,321	.91	349	.55

A majority of the native born are 21 years of age and under; the males representing 51.34 per cent. and the females 49.48 per cent. of the total native born population of each sex, respectively, of those ages. A majority of the foreign born are included in the age period from 15 to 39 years; the males representing 54.54 per cent. and the females 53.83 per cent. of the total foreign born population of each sex, respectively. Compared by age periods, it is seen that the largest number of native born is found in the age period of 9 years and under, and of the foreign born in the age period between 20 and 29 years, inclusive.

Notwithstanding the fact that there are 5,647 more native females than males, and 3,931 more foreign born females than males, there are in the dependent age period 372 more native males than native females, and 102 more foreign males than foreign females. In 1885, for the same age period, there were 143 more native males than females, and 59 more foreign females than males.

The table giving the dependent, productive, and aged periods, compared with similar tabulations of the previous three State censuses, shows the following changes in the ratio of each class to the total population :

PERCENTAGE OF EACH CLASS TO THE TOTAL POPULATION.

CENSUS.	DEPENDENT.	PRODUCTIVE.	AGED.
	Under 15 years.	15 to 59 years.	60 years and over.
1895.....	27.52	64.88	7.60
1885.....	28.44	63.35	8.21
1875	29.48	63.18	7.34
1865.....	31.18	61.39	7.43

This change in the ratio, showing a loss for the dependent age, might be taken as an indication of a decline in the birth rate, but that is probably not the case. The native born under 15 years of age increased during the decade 19.99 per cent., as against 19.78 per cent. increase in the total native born population. Further, if the native born ten years of age and under is considered, we find during the decade an increase of 13,706, or 23.09 per cent. The increase in the percentage of the productive age period is undoubtedly due to the accession in large numbers of the foreign born of mature age.

The age detail for the State shows that out of a total of 7,440 children under one year of age 88 are foreign born; and that there are 231 persons of the age of 90 years and over. Of this latter number, 49 are native males, 17 are foreign males, 124 are native females, and 41 foreign females. In 1885 there were 6,065 children under one year of age, of whom 61 were foreign born; and 232 of 90 years of age and over, of whom 46 were native males, 8 foreign males, 136 native females, and 42 foreign females. The oldest person reported in this census is a foreign born female

in Warren, whose age is 104 years. In 1885 the oldest person was a native born female 115 years. In this census there are 9 females over 100 years, and in 1885 there were 2 males and 12 females. Seven of the centenarians in this census are found in Providence county, 1 in Washington county, and 1 in Bristol county.

The political tables show the number of males 21 years and over, or what is known as "adult males." There are 112,859 adult males, of whom 65,134 are native born and 47,725 are foreign born; an increase during the decade of 31.65 per cent. in the adult males, 21.04 per cent. in the native adult males and 49.55 per cent. in the foreign adult males.

The table giving the males of military age (18 to 44 years, inclusive) shows, compared with 1885, an increase of 9,777, or 23.64 per cent. in the native born; 12,132, or 53.68 per cent., in the foreign born; and an increase of 21,909, or 34.25 per cent., in the total males of military age. In 1885 the males of military age formed 21.02 per cent. of the total population; during the decade they have increased to 22.32 per cent. of the total population.

COLOR AND RACE.

The population by color and race is presented in Tables XXIII, XXIV, XXV and XXIX. In this census negroes and mulattoes have been placed in one division as "black and mixed," instead of the two divisions used in the census of 1885. An attempt was made to secure the enumeration of the black and mulattoes as separate classes, but upon examination of the returns it was found that in this, as in other matters where a determination depended upon the judgment of individual enumerators, the result was unsatisfactory. In regard to the Indians reported, it should be explained that in the returns as received by the census department very few Indians were specified. They were generally enumerated as black or mulatto. This is by no means a new experience, as it is doubtful if there are any full-blooded Indians of the original tribes remaining in the State. But the census of 1885 went very carefully into the subject, and enumerated as Indians all those whose mothers were of Indian blood, thus following the rule of that race for reckoning lineage. The figures reported in this census, of Indians, were obtained by comparing this census' returns with those of 1885, and classifying as Indians all those whose mothers were found to be of the Indian race in 1885.

The colored portion of the population has increased 892, or 12.15 per cent., during the decade; while from 1875 to 1885 the increase was 1,071, or 17.08 per cent.

The increase in the black and mixed during the decade is 810, or 11.39 per cent. There is a decrease of 31, or 15.58 per cent., in the Indian race; an increase of 106, or 365.52 per cent., in the Chinese; and an increase of 7, or 350 per cent., in the Japanese. In 1875 9 Chinese were reported in the State; 27 in 1880; and 29 in 1885. The Japanese appeared for the first time in 1885, to the number of two.

The following table will show the number of colored persons, including negroes, mulattoes, Indians, Chinese and Japanese, at

the several census periods, and the percentage of the same to the total population of each census period :

CENSUS.	Number.	Per cent. to Total Population.
1708.....	426	5.93
1730.....	1,648	9.18
1748.....	3,077	9.39
1774.....	3,768	6.31
1782.....	2,861	5.47
1790.....	3,863	5.61
1800.....	3,694	5.34
1810.....	3,717	4.83
1820.....	3,602	4.33
1830.....	3,579	3.68
1840.....	3,243	2.98
1850.....	3,670	2.48
1860.....	3,952	2.26
1865.....	4,087	2.21
1875.....	6,271	2.43
1885.....	7,342	2.41
1895.....	8,234	2.14

Considered by sex, the increase of the male black and mixed is 500, or 15.89 per cent.; and of the females, 310, or 7.82 per cent. Considered by general nativity, the increase of native born is 746, or 10.66 per cent.; and of foreign born, 64, or 57.14 per cent.

Of this race there is a decrease of 17 in Bristol county; mainly in the towns of Bristol and Warren. A decrease of 12 in Kent county; chiefly in the towns of Coventry and East Greenwich. West Greenwich, which reported none in the 1885 census, reports 12 black and mixed in this census. Newport county shows a gain of 316 during the decade, or 19.84 per cent.; of which number 189 are males and 127 females. All civil divisions in Newport county, except New Shoreham, show an increase. Providence county shows an increase of 372, or 8.50 per cent.; of which 223 are males and 149 females. Seven towns in Providence county show a decrease. The city of Providence has 4,039 of the black and mixed, an increase of 132 males and 45 females during the decade. Washington county shows an increase of 151 during the decade, or 25.25 per cent.; of which 106 were males and 45 females.

Two towns in Washington county show a decrease in black and mixed during the decade.

Of the total population of black and mixed, 20.66 per cent. are found in Newport city, and 50.98 per cent. are found in the city of Providence.

An examination of the black and mixed by age periods shows that only one in about 60 persons are under one year of age, and 16.14 per cent. of the total black and mixed population are 9 years of age and under. Considered by the dependent, productive, and age periods, the following presentation is made :

AGE PERIOD.	1885. Per cent. to total population. Black and Mixed.	1895. Per cent. to total population. Black and Mixed.	Increase or decrease since 1885.	Per cent. of increase or decrease.
Dependent	27.59	24.26	—40	—2.04
Productive	65.66	69.30	+820	+17.56
Aged	6.75	6.44	+30	+6.25

Of the 168 Indians reported, 126 are found in Washington county, descendants of the old Narragansett tribe, 90 of whom are in the towns of South Kingstown, and 36 in Westerly. The two foreign born Indians reported are from Canada. Of this race, 36 are found in the dependent period, 118 in the productive, and 14 in the aged. In 1885 there were 49 in the dependent, 129 in the productive, and 21 in the aged.

Of the 135 Chinese, 115 are found in Providence county (76 of whom are in the city of Providence); 18 in Pawtucket; 9 in Woonsocket; 4 in Central Falls. Newport has 5 Chinese, as well as 7 out of the 9 Japanese. The age periods will show that the entire number of Chinese and Japanese are found in the ages between 15 and 59.

CONJUGAL CONDITION.

The conjugal condition of the people has been referred to in the general survey of the State, and it is given in detail in Tables XXVII, XXVIII, and XXIX. Compared with the census of 1885, the figures for this census show a slight gain for the single, and a slight decrease for the married and widowed in the percentage of each class to the total population. The small increase in the number of divorced is a significant feature.

A small percentage of single and a large percentage of widowed in the towns showing a decrease in population, with the exception of Warren and North Smithfield, may be noted. These same towns show a percentage above that of the State for the married class. Cities having a large foreign born population, like Woonsocket and Central Falls, and towns like Warwick, Cumberland and Lincoln, show a larger percentage of single and a smaller percentage of married and widowed than the rest of the State. The largest percentage of single to the total population of any town or city is in the city of Woonsocket, it being 60.67 per cent. for the entire city, and 63.09 per cent. for the fifth ward. Lincoln has a percentage of 60.43 per cent., and the city of Central Falls, 59.82 per cent.; the fourth ward of that city containing 63.09 per cent. The largest percentage of married is in the town of New Shoreham, 48.77; and the smallest is in the fifth ward of Newport, which has 31.06 per cent. The smallest percentage of single is in the town of Foster, which has 41.85 per cent. The largest percentage of widowed is found in Foster, with 9.33 per cent., and Gloucester is close to it with 9.25 per cent. The largest percentage of divorced is in the town of West Greenwich, and the town of Scituate; there are 19 of this class in the former and 49 in the latter.

Considering the ratio of each class to the total population by general nativity, we find the following results:

SEX AND NATIVITY.	Single.	Married.	Widowed.	Divorced.
Native males	65.59	31.16	2.95	.30
Foreign males	40.18	54.90	4.83	.09
Native females	62.35	29.97	7.19	.49
Foreign females	36.94	50.37	12.55	.14

Of the married males, 39,830, or 54.89 per cent. are found between the ages of 25 and 44 years; and 41,312, or 57.36 per cent. of the married females are found in the same age period. Of the widowers, 4,180, or 62.88 per cent., are found between the ages of 50 and 79 years; and of the widows, 11,269, or 64.17 per cent.; are found in the same age period.

Of the divorced, 282 of the males, or 64.83 per cent., and 459 of the females, or 61.45 per cent., are found between the ages of 35 and 59 years.

In the towns of Warwick, Johnston and North Smithfield, the foreign born married exceed numerically the native born married. In the fifth ward of Newport, in Central Falls and the wards of that city except the first, in the fourth and fifth wards of Pawtucket, in the five wards of Woonsocket, in three wards of Providence, as well as in the towns of Cumberland and Lincoln, the foreign born married and widowed exceed the native born of the same classes, numerically. In the fourth ward of Central Falls, with a population of 1,931 native and 1,984 foreign, the native born married form 10.82 per cent., and the native born widowed form .83 per cent. of the total native born; while the foreign born married and the foreign born widowed form 54.18 per cent. and 7.31 per cent. of the total foreign born.

Considered by races, 37.02 per cent. of the black and mixed are married, 9.38 per cent. widowed, and .58 per cent. divorced, in this census. In 1885 the percentages were: married, 36.45; widowed, 9.77; and divorced, .62 per cent.

Of the Indians, 32.74 per cent. are married, and 12.50 per cent. are widowed. In 1885, 39.20 per cent. were married and 10.05 widowed.

Of the Chinese, 24 are married, and 1 widowed. There is 1 married Japanese.

In connection with this subject the statistics of marriages and divorces found in the reports of the State Board of Registration

are most pertinent. Those statistics show that in 1885 there were 2,488 marriages and 227 divorces granted, or one divorce to every 10.96 marriages. In 1895 the number of marriages were 3,497, and the divorces granted, 373; or one divorce to every 9.38 marriages. It happens, however, that these years were exceptional ones. In 1885 the percentage of divorces to marriages was smaller than it had been for many previous years, and in 1895 the percentage was unusually large. Considered by decades, the following results are obtained: from 1876 to 1885, inclusive, the number of marriages was 25,065, divorces, 2,372, or one divorce to every 10.57 marriages; from 1886 to 1895, inclusive, there were 31,969 marriages, and 2,772 divorces, or one divorce to every 11.53 marriages.

OCCUPATIONS.

The occupations of the population of the State are presented in three tables. In Table XXXVI they are arranged in fourteen general divisions. In Table XXXVII these divisions are subdivided with much detail, and the occupations, not only of each sex, but of the native born and eight principal nationalities, are given.

In Table XXXVIII the principal occupations of the population of each town and city are given. The term "occupation" for census purposes means the principal source of livelihood, and when, as is often the case, a person has several means of employment, the one upon which he chiefly depends for his living is the one under which he is classified. For instance, a man who is a lawyer, but holds a minor government position which only requires a small portion of his time, would be classified under the professional division rather than the government. But a man who is a lawyer and a judge, giving his whole time to the latter duty, would be placed in the government class. So far as possible the line has been strictly drawn in arranging the population under the general divisions. Under the government division there are classified not only heads of departments, but also all employees, from clerks to laborers, and in this census there have been placed in that division all public school teachers, judges and court officers, which in 1885 were classified in the professional division. From the professional division have been omitted certain occupations, such as clairvoyants, base-ball players, skating-rink proprietors, and stenographers, which were classified therein in the census of 1885. In the domestic division are included all employers and employees who are engaged in boarding and lodging service, as well as all domestic servants. In this division have also been placed all restaurant keepers and employees; and saloon keepers, which were classified therein in 1885, have been transferred to the trade division. Under the personal service division are found such occupations as barbers, boot-blacks, hair-dressers, matrons and nurses. The trade division is a large one, to which it is diffi-

cult to place an arbitrary boundary. Under this census there have been placed therein merchants, dealers, clerks, bookkeepers, accountants, salesmen, and business managers; in fact, so far as possible, all persons engaged in trade and commerce, except those classified in the transportation division. It does not, of course, include all clerks, because some of them are found in the government division and others in the transportation division. The term "clerk" is, in Rhode Island, so generally used as synonymous with salesman, that it has been found impossible to separately classify salesmen in stores from those doing what is usually considered as clerical work. The occupation detail under which they are tabulated must serve the purpose of indicating whether they are salesmen, clerks, or copyists.

The transportation division includes not only employers, but employees of every description, from the clerk in the freight office to the waiter on the steamboat.

Under agriculture are classified farmers and their assistants, in fact, every form of labor which has to do with the tilling of the soil, or the raising of animals. In the manufactures and mechanics division the line is more strictly drawn, and no person is classified therein who is not engaged in some mechanical or manufacturing industry, either having oversight of the work, or directly handling tools or machines. This division includes common laborers engaged in particular industries, as well as skilled operatives. If a comparison is made with the detail of this division in the 1885 census, it will be noticed that in the tables of this report many minor industries have been generalized, and an attempt has been made to give the more important industries in greater detail, such, for instance, as the textile and the jewelry. It is a matter for regret that this idea could not have been more successfully carried out, but it is felt that an advancement has been made over previous tabulations, and that what has been accomplished will be of value in the arrangement of future industrial statistics in this State. The great difficulty which the department has had to contend with is the disposition on the part of a large number of people to report their occupations in such terms as "jewelry," "cotton," or "woolen." When asked to particularize what special line of work they perform in these industries, no other answer can be obtained than "general bench hand," or "operative." Many of the enumerators were requested to call again for the purpose of obtaining a more definite response, but were un-

able to get further information. In most cases, of course, the enumerator would interview the head of the family at home, who was, perhaps, the wife or mother, and she would not be in a position to furnish the information desired. Hence we have 4,653 persons employed in the jewelry trade, of whom 2,833 are tabulated as "jewelers not classified." It must be manifest to every one in that trade that there is a much larger number of persons employed in the several special occupations detailed in that industry than are given in the tables; and the same is true of the workers in all branches of the textile industry.

Table XXXVII will fully explain the occupations that are embraced in the general divisions of Table XXXVI. Those who have been engaged in the preparation of these tables are aware that an improvement can be made in the present classification, but as it was desirable, for the purpose of comparison, to keep as far as possible to the arrangement of the 1885 census, the department has been contented with the few changes previously referred to. This must not be considered as any criticism upon classifications made in the previous censuses, for every statistician is aware that a perfect system of arranging occupations has not yet been adopted, and that many improvements have been made from time to time since the first attempt to show the industries in which the people are employed.

Comparisons are not to be expected between the occupation tables and the number of employees reported in the manufacturing tables, because the figures given in the latter tables represent the *average* number employed during the year, and include not only operatives, but also clerks, salesmen, and every other employee of the firms reporting.

The occupation tables of this census show that there are 253,485 persons engaged in some remunerative or useful occupation. This number is obtained by omitting the scholars and students, and other not gainful and non-productive classes, such as the criminal, insane, deaf, dumb and blind, children at home, and the unemployed over 16 years. The number above given forms 65.88 per cent. of the total population of the State, and consists of 123,652 males, and 129,833 females. The males form 65.92 per cent. and the females 65.85 per cent. of the total population of each sex. If from the total female workers are taken the 83,910 of that sex classified as housewives, or engaged in housework, the result is 45,923, or 23.29 per cent. of the total female popula-

tion. In this enumeration the term "housewife" has been used for females who are heads of families, or wives; or women keeping house by themselves, who have no gainful occupation, and who receive no stated salary or wages. The term "housework" has been used for daughters, sisters, or other relatives or friends who assist in the domestic work of the family without a stated salary or wages for their services, and who have no remunerative employment. In 1885 there were 201,738 persons of what may be termed the productive class, as given above, or 66.30 per cent. of the total population of the State. Of this number 97,506 were males and 104,232 were females. The males represented 66.61 per cent. of the total male population; and the females, 66.02 per cent. of the total female population. Deducting the number of housewives and those engaged in housework, 60,109, the result is 44,123, or 27.95 per cent. of the total female population.

There is an increase during the decade of 51,747, or 25.65 per cent., in the number engaged in some remunerative or useful occupation, of which 26,146 are males and 25,601 females. The increase in the males is 26.81 per cent., and in the females, 24.56 per cent. So far as comparisons are practicable with the tables of the 1885 census, the essential results regarding occupations of females during the decade are a large increase of that sex in the trade division, and an increase in that sex of only 18.53 per cent. in the manufactures and mechanics division. In the trade division the increase in males during the decade is 4,767, or 35.88 per cent.; and the females, 2,389, or 206.66 per cent. In view of the transfer of public school teachers and others from the professional to the government division in this census, the totals of these two divisions may be compared with the totals of the same divisions in the 1885 census, and the comparison will show an increase of 2,320, or 46.99 per cent., for the males; and 711, or 35.39 per cent., for the females. This large increase of males may be attributed to some extent to the fact that under this census there has been classified in the government division the common laborers employed in the public works departments of the cities. In the domestic division, the increase of females has been 18,054, or 23.58 per cent.; and of the housewives, 14,290, or 24.43 per cent.

In the transportation division an increase is shown during the decade of 3,562 males and 29 females, a total of 3,591, or 54.11 per cent. Of this increase, 2,513 are found in the local transport ser-

vice, largely contributed to by persons classified as teamsters. It seems probable that in the 1885 census, teamsters employed by particular industries were classified under such industries, which is not the case in this census. An examination of the figures for local transport service will reveal the development of rapid transit during the decade; the 406 officials and employees of horse railroads enumerated in 1885 become 786 electric railroad officials and employees in this census. In the steam railway service there has been an increase during the decade of 1,008, and in the water transport service an increase of 70.

The agriculture division shows a decrease of 839 males and 7 females, a total of 846, or 6.59 per cent. Considering persons classified in this division engaged strictly in agricultural pursuits the following is presented :

OCCUPATIONS.	1895.	1885.
Farmers and assistants.....	10,459	11,907
Gardeners and florists.....	1,101	760
Market gardeners.....	219	87
Poultry raisers.....	115	30

In the fisheries division a decrease is shown of 93, or 10.97 per cent. In addition to those classified in this division there are, under agriculture, 33 farmers and fishermen as against 52 in the 1885 census. The manufactures and mechanics division shows an increase of 13,328 males, 4,312 females, a total of 17,640, or 24.55 per cent. In the principal manufacturing and mechanical industries of this State the increase by nationalities will be seen from the following :

CENSUS.	Total.	United States.	Ireland.	Great Britain.	Canada.	Germany.	Other Countries.
TEXTILES.							
1895.....	41,621	19,326	4,251	6,736	8,484	685	2,039
1885.....	34,546	17,006	5,578	5,861	5,288	358	455
Increase or decrease.....	7,075	2,320	-1,227	875	3,196	327	1,584

CENSUS.	Total.	United States.	Ireland.	Great Britain.	Canada.	Germany.	Other Countries.

Increase or decrease.....	1,089	508	65	92	189	-19	254
STONE WORK.							
1895.....	1,400	399	173	327	72	9	420
1885.....	638	286	125	164	28	8	27
Increase.....	762	113	48	163	44	1	393

Other minor industries showing an increase during the decade are: Artisans' tools, 490, or 69.80 per cent.; carriages and wagons, 62, or 11.48 per cent.; food preparations, 856, or 120.56 per cent.; printing, 236, or 31.59 per cent.

Some principal occupations in which a large portion of the population of the State is engaged are found in the following table, in which is given the increase or decrease during the decade:

OCCUPATIONS.	1895.	1885.	Increase or decrease.
Carpenters.....	4,999	3,998	1,001
Masons and masons' tenders.....	1,406	1,406	—
Painters.....	2,143	1,706	437
Plumbers.....	796	587	209
Dressmakers.....	3,197	2,667	530
Milliners.....	526	393	133
Tailors.....	794	919	—125

The extensive adoption, during recent years, of electricity as an illuminant and power has rendered necessary the introduction of a special section in the manufactures and mechanics division devoted to that occupation, in which have been classified 470 persons. So far as possible they have been arranged in the particular branches of the work in which they were engaged, such as engineers, laborers, linemen, trimmers; but the general use of the term "electrician," in describing their occupation to the enumerators, has rendered the task somewhat difficult; and while the presentation of this important industry is not perfect, it will, at least, serve as a guide for classification of this occupation in future censuses.

The following table will show the percentage of the productive population in each of the general divisions given in the occupation tables:

DIVISION.	Total population.	Male.	Female.
Government.....	2.45	3.64	1.32
Professional.....	1.48	2.23	.77
Domestic.....	38.41	2.22	72.89
Personal service.....	1.13	1.49	.79
Trade.....	8.52	14.60	2.73
Transportation.....	4.04	8.24	.03
Agriculture.....	4.73	9.60	.10
Fisheries.....	.30	.61	.00
Manufactures and mechanics.....	35.31	50.07	21.24
Laborers and apprentices.....	2.64	5.34	.07
Occupations not classified.....	.99	1.96	.06

An analysis of the general divisions of occupation by nationalities shows that the following percentage of each division is represented by the nationality named:

Government.—Native born, 67.88 per cent.; Irish, 17.05 per cent.; Italian, 4.24 per cent.; French Canadian, 2.54 per cent.; English, 2.57 per cent.

Professional.—Native born, 79.45 per cent.; Irish, 3.54 per cent.; English, 5 per cent.; French Canadian, 4.02 per cent.

Domestic.—Native born, 55.03 per cent.; Irish, 18.46 per cent.; English, 7.78 per cent.; French Canadian, 6.84 per cent.; English Canadian, 2.68 per cent.

Personal Service.—Native born, 59.55 per cent.; Irish, 11.52 per cent.; French Canadian, 6.74 per cent.; English, 5.41 per cent.; Italian, 5.17 per cent.; English Canadian, 3.94 per cent.; Germans, 2.93 per cent.

Trade.—Native born, 76.27 per cent.; Irish, 6.07 per cent.; English, 4.77 per cent.; French Canadian, 4.13 per cent.

Transportation.—Native born, 68.05 per cent.; Irish, 14.17 per cent.; French Canadian, 5.37 per cent.; English, 3.05 per cent.

Agriculture.—Native born, 71.98 per cent.; Irish, 8.01 per cent.; French Canadian, 3.61 per cent.; Italian, 2.78 per cent.; Swedish, 2.66 per cent.; English, 2.63 per cent.

Fisheries.—Native born, 91.66 per cent.

Manufactures and Mechanics.—Native born, 53.37 per cent.; French Canadian, 12.87 per cent.; English, 10.60 per cent.; Irish, 10.49 per cent.; other British, including English Canadian, 4.61 per cent.

That is to say, taking the manufacturing and mechanical division, for instance, 53.37 per cent. of the persons occupied in this division are native born, and 12.87 per cent. are French Canadian.

A comparative classification by nationalities of that portion of the population not engaged in any profitable or useful occupation for a livelihood, as presented in the two censuses, is herewith given:

CENSUS.	Total.	United States.	Ireland.	Great Britain.	Canada.	Germany.	Other Countries.
1895.....	131,273	115,069	3,353	3,938	5,916	516	2,481
1885.....	102,546	93,805	3,100	2,382	2,514	233	512
Increase.....	28,727	21,264	253	1,556	3,402	283	1,969

In this connection it should be explained that in the “non-productive” division are placed those of the defective classes who

are of the productive age period, and who, on account of their defective physical and mental condition, are prevented from earning a necessary livelihood, and have become a private or public charge.

In Table XXXVIII an endeavor has been made to present a picture of the industrial life of the several cities and towns. This table is by no means a detail of the preceding one, nor are the classifications of occupations in the former followed in all respects in the latter. In some cases in Table XXXVIII it has been considered useful, for the purpose of illustrating the significance of certain leading industries, to classify all the wage earners depending thereon as employees. This term "employees" signifies not merely a skilled operative, but, in many cases, packers, laborers, teamsters, and others who are directly employed by the industries. The idea presented in a similar table in the 1885 census has been carried out more extensively in this report, and it will be found that every city and town is represented by a more varied list of industries than in any previous State census.

CHILDREN—SCHOOL ATTENDANCE AND EMPLOYMENT.

School attendance, absenteeism, and the employment of minors are treated in Tables XXXIX and XL. The former table shows the total population of the State between the ages of 7 and 15 years, inclusive; the number attending public or private school; absent from school at home or at work, and at school and at work. The statistics are given by sex, and also by the general nativity of the father, in four age periods. In arranging these age periods the department has had in mind the statutes relating to school attendance and the employment of children, also the classification in the census of 1885, so as to permit of comparisons therewith. Under the term "private schools" are included parochial schools, and all educational institutions not supported from the town, city or State treasury.

The State laws require that all children between the ages of 7 and 15 years shall attend school for at least eighty full school days during the year, and that no child between the ages of 12 and 15 years shall be employed in any manufacturing, mechanical or mercantile establishment, or by any telegraph or telephone company, unless he shall have already acquired the elementary branches of learning taught in the public schools, or shall be excused by the school committee of the town in which he resides. No factory, manufacturing or mercantile establishment employing five or more women or children, may employ a child under 12 years of age. The employment of minors is further safeguarded by the provision that they shall not be employed without the presentation of a certificate issued by the school committee of the city or town, or given under its direction, showing that the child has complied with the requirements of the law; and the firm employing such child shall keep such certificate on file. In view of these regulations the tables of this census, in regard to school attendance, present one more age period than those of 1885, viz., 15 years of age.

Of the total population of 60,748 between the ages of 7 and 15 years, inclusive, 50,948, or 83.87 per cent., attend school. Of this number 15.81 per cent. attend private school. There are 3,235, or 5.33 per cent. of the total population between the ages of 7 and 15 years, inclusive, absent from school at home; and 6,565, or 10.81 per cent., absent at work. An attempt was made to enumerate the children who both work and attend school, but as only 232 were reported, it is evident that the result is not satisfactory. The children at school and at work, for the purpose of analyzing Table XXXIX, are considered as attending school, and are placed among the public school children.

Between the ages of 7 and 9 years, inclusive, there are 20,816 children, of whom 19,157, or 92.03 per cent., attend school. Of the school attendants 3,078, or 16.07 per cent., are in private schools. There are also 1,648, or 7.92 per cent. of the total number of children absent from school, either at home or at work, and only 11 are reported at work.

There are 12,905 children between the ages of 10 and 11 years, inclusive, and of this number 12,328, or 95.53 per cent., attend school. The private school attendants form 17.76 per cent. of those attending school. There are absent from school, either at home or at work, 577, or 4.47 per cent. of the population of this age period.

The population between 12 and 14 years of age is 20,081, of whom 16,085, or 80.10 per cent., attend school. Of the school attendants, 2,408, or 14.97 per cent., are found in private schools. Those absent at home number 721, or 3.59 per cent. of the total for this age period; and those at work number 3,275, or 16.31 per cent. of the total. There are 164 reported at school and at work. Of the total of 3,275 reported at work in this age period, the children of foreign parents number 2,678, or 81.77 per cent.

There are 6,946 children of 15 years of age, and 3,378 of them, or 48.63 per cent., attend school. The private school attendants of this age number 381. Of this age 411, or 5.92 per cent., are absent from school at home; and 3,157, or 45.45 per cent., are absent at work. There are 66 reported at school and at work.

Considered by the general nativity of the father it will be found that of the total of 60,748 children between the ages of 7 and 15 years, inclusive, 34,329 are of foreign fathers; and of the total of 42,659 public school attendants 20,955 are of foreign fathers; and of the 8,057 private school attendants, 6,037 are of foreign fathers.

Of those absent at home, 1,648 are between the ages of 7 and 9 years; 1,132 between the ages of 12 and 15 years, inclusive; and of the total number of absentees at home, 1,975 are of foreign fathers.

Of the 6,565 absent from school at work, 11 are found between the ages of 7 and 9 years; 122 between the ages of 10 and 11 years; 3,275 between 12 and 14 years; and 3,157 of 15 years of age; and of the total number absent from school at work, 5,191 are of foreign fathers.

Of the 232 children at work and at school, 171 are of foreign fathers.

Compared with the census of 1885, we find the following increase or decrease :

ATTENDANTS AND ABSENTEES.	Increase or decrease.	Per cent.
Population 7 to 14 years, inclusive.....	7,920	17.26
School attendants.....	7,670	19.22
Public school attendants.....	5,575	16.24
Private school attendants.....	2,095	37.54
Absentees at work.....	—119	—3.37
Absentees at home.....	369	15.03
Total absentees.....	250	4.18
Ages 7 to 9 years.....	3,403	19.54
School attendants.....	3,329	21.03
Absentees.....	74	4.67
Ages 10 to 14 years.....	4,517	15.87
School attendants.....	4,341	18.03
Absentees.....	176	4.00

It will be noticed that while the total population of this age period has increased 17.26 per cent. during the decade, the population attending school has increased 19.22 per cent., and the absentees have increased only 4.18 per cent.

The following table shows the percentage of children attending school between 7 and 15 years of age, absent at home, and absent at work, to the total population of that age period for the State and five counties:

COUNTIES.	School attendants.	Per cent.	Absent at home.	Per cent.	Absent at work.	Per cent.
THE STATE.....	50,948	83.87	3,235	5.32	6,565	10.81
Bristol County.....	1,521	79.84	84	4.41	300	15.75
Kent County.....	3,824	70.40	388	7.14	1,220	22.46
Newport County.....	3,827	89.48	231	5.40	219	5.12
Providence County.....	38,339	84.57	2,388	5.27	4,606	10.16
Washington County.....	3,437	90.42	144	3.79	220	5.79

Table XL, showing the number and occupations of children of the ages of 15 years and under, cannot be examined without arousing the suspicion that the laws relating to the employment of minors are not strictly recognized by the parties interested. The bright feature of these statistics is found in a decrease of this class of children since 1885. It is no easy matter to determine the exact age of a child, and it is not improbable that some parents who are anxious to have their children contribute as early as possible to the income of the family, will not allow the true ages of their sons and daughters to stand in the way of their desires. The office of factory inspector has been established during the decade, and the incumbents of that position have testified, in their annual reports, to the general desire of employers to comply with the laws in regard to the employment of minors, and to their willingness to permit an investigation at any time of their factories and records.

Table XL shows the occupation in detail of children between the ages of 7 and 15 years, inclusive, by sex and nativity of father, and deals with the employment of 6,797 minors, including those who both work and attend school. Of this number, 5,362, or 78.89 per cent., are of foreign fathers; 2,817 are males and 2,545 are females. Between the ages of 7 and 9 years, inclusive, there are 11 employed; of 10 and 11 years of age there are 124; between 12 and 14 years, inclusive, there are 3,439; and of 15 years of age there are 3,223.

Of the number of children under consideration, 5,089, or 74.87 per cent., are engaged in manufacturing or mechanical trades, of whom 4,457, or 87.58 per cent., are employed in textile industries, as follows:—cotton goods, 2,826; hosiery, 201; bleacheries, dye and print works, 228; silk, 8; woolen and worsted goods, 1,194. This

does not accord with the figures given in the table of manufactures, but, as previously explained, the manufacturers were not very willing to classify their help, and, further, there is a possibility of the ages given to the employer being higher than those reported to the census enumerator.

Besides those engaged in the textiles, there are 131 in jewelry, 574 in domestic service, 198 in farming, and 142 are classified as apprentices.

Of the 11 employed that are between the ages of 7 and 9 years, 6 are reported in cotton mills, 2 in woolen mills, 2 engaged as errand boys, and 1 in housework. Of those employed between 10 and 11 years of age, 61 are in cotton mills, 18 in woolen and worsted mills, 17 in domestic service, and 8 in farming and fisheries.

Of the total of 6,797 children employed, 1,435 are of native fathers, 1,345 of Irish, 2,184 of Canadian French, 139 of Canadian English, 701 of English, 170 of other British, 134 of German, 169 of Swedish, 253 of Italian, and 267 of other nationalities.

Comparing the number of children at work between the ages of 7 and 15 years, inclusive, with the figures of 1885, we find a decrease of 1,214, or 15.15 per cent. There is a decrease of 1,394 of those employed in manufacturing and mechanical trades, and of 1,248 of those employed in textiles.

Compared by nativity of father, we find a decrease of 3,958 children of native fathers, an increase of 721 of Irish, 1,036 of Canadians, 351 of other British, 96 of Germans, and 540 of other nationalities.

ILLITERACY.

The illiteracy of the population of the State is presented in Tables XLI, XLII, XLIII and XLIV, which give the total population ten years of age and over, the number of illiterates of two classes by age periods, sex, general nativity, and birthplace of father. The two classes into which illiterates are divided are those who can read but not write, and those who can neither read nor write. This feature of the enumeration, like that of the defective condition of the people, is one of the most unsatisfactory of the problems which the census must handle. People, naturally, are not willing to acknowledge that they, or any of their family, are illiterate, or that they are deaf, dumb or feeble-minded. Further, the carelessness of the enumerator in marking the cards upon which the information is reported may make some difference to the percentage in a small community, which cannot, perhaps, even be detected until the tables are made up. This, of course, should be borne in mind in a detailed and rigid analysis of the figures respecting this class of the population. In general, however, the results of this census in regard to illiteracy are in harmony with those of previous returns. As stated in the general survey, while there has been a numerical increase of illiterates, the proportion of illiterates to the total population is smaller.

The number of persons 10 years of age and over is 311,870, an increase of 65,638, or 26.66 per cent., since 1885. Of this number 29,752 are illiterates, an increase of 3,439, or 13.07 per cent. The native born, ten years of age and over, have increased 29,847, or 18.12 per cent.; and the native born illiterates have *decreased* 794, or 13.03 per cent. The foreign born, ten years of age and over, have increased 35,791, or 43.91 per cent.; while the foreign born illiterates have increased 4,233, or 20.93 per cent.

Of the class that read but cannot write there are 5,651, a decrease of 2,250 compared with 1885. The number of native born of this class is 1,457, or 25.78 per cent., a decrease of 1,052 during the decade. The number of foreign born is 4,194, or 74.22

per cent., a decrease of 1,198 during the decade. There are 24,101 who can neither read nor write, an increase of 5,689 since 1885. Of this class 3,841 are native born, or 15.94 per cent., and 20,260 foreign born, or 84.06 per cent. There has been a small increase of 258 in the native born of this class during the decade, and 5,431 in the foreign born.

The decrease in those who can read but cannot write, in both the native and foreign born, and the increase in those who can neither read nor write in the foreign born, are common to all age periods. But the increase in those who can neither read nor write in the native born is to be found in the ages between 10 and 14, 20 and 29, and 50 years and over.

The following table shows the percentage of increase in illiterates according to the father's nationality:

PARENTAGE OF FATHER.	ILLITERACY BY PARENTAGE. INCREASE OR DECREASE SINCE 1885.		
	Illiterates, 1895.	Increase or decrease.	Per cent.
Native.....	2,690	—777	—22.41
Irish.....	8,268	—4,224	—33.81
English, Scotch, and Welsh.....	1,267	—82	—6.08
German.....	268	143	114.40
French.....	109	40	57.97
Italian.....	3,126	2,819	918.24
Canadian.....	11,162	3,415	44.08
Portuguese.....	1,304	827	173.38
Other Countries*.....	1,558	1,278	456.43

* Other Countries include: Russia, 429; Sweden, 396; Poland, 223; Austria, 108; Belgium, 95; Turkey, 114; China, 36; Other Countries, 96; Unknown, 61.

POLITICAL CONDITION.

The political condition of the population is treated in Tables XLVIII, XLIX, L, LI, LII, which show the number of males 21 years of age and over, the legal voters, non-voters, and aliens by general nativity, place of birth and birthplace of father. The term "legal voter" in this classification signifies all citizens who have resided in this State two years or more, and whose names would have appeared upon the voting lists if they had been tax-payers, or had registered in accordance with the law. The term "non-voter" signifies all citizens who have not been two years in this State, or who, for other reasons, such as belonging to the criminal or defective class, are disqualified from voting. The number of the criminal and defective classes is so small that it is not deemed necessary to tabulate them separately.

Of the total male population of the State, 112,859, or 60.16 per cent., are 21 years of age and over, and of this number, 86,709, or 76.83 per cent., are legal voters; and 3,847, or 3.41 per cent., are non-voters; 22,303, or 19.76 per cent., are aliens.

Compared with 1885, these figures show an increase of 27,132 adult males during the decade, or 31.65 per cent.; an increase of 11,320 native born adult male citizens, or 21.04 per cent.; and an increase of 17,190 foreign born adult male citizens, or 208.82 per cent.; a decrease of 1,378 aliens, or 5.82 per cent.

In 1885 the native born citizens formed 62.77 per cent. of the total adult male population; the foreign born citizens, 9.60 per cent.; and the aliens, 27.63 per cent. In this census the proportion is: native born citizens, 57.71 per cent.; foreign born citizens, 22.53 per cent.; and aliens, 19.76 per cent. of the total population.

How extensively the foreign born have availed themselves of the right to become citizens, which was extended in 1888 by Article VII in Amendment to the State Constitution, is shown by the fact that while the foreign born male adults have increased 49.55 per cent. during the last decade, the increase of foreign born male citizens is 208.82 per cent.

The following table shows the percentage of citizenship to the total number of male adults of the principal nationalities, according to the nativity of the population, and the nativity of fathers :

NATIONALITY.	PER CENT. TO TOTAL MALE ADULTS.	
	Nativity of Population.	Nativity of Fathers.
Canada (French).....	38.09	47.37
Canada (English).....	48.19	59.34
Ireland.....	69.43	82.35
England.....	61.20	70.16
Scotland and Wales.....	61.46	71.24
Russia and Poland.....	44.82	46.07
Italy.....	16.38	17.12
Germany.....	63.70	74.90
Sweden.....	41.04	42.30
Portugal.....	16.93	22.42

The only comparison available with the figures given in 1885 is presented by the following :

NATIONALITY.	Per cent. to total male adults.
Ireland.....	33.08
Canada.....	8.62
Other British.....	26.29
Germany... ..	35.69

From this it will be seen that 33.08 per cent. of the male adults of Irish birth were citizens in 1885. By this census the proportion is 69.43 per cent. For the Germans, in 1885, it was 35.69; by this census it is 63.70 per cent.

In considering the table giving the birthplace of fathers, in connection with that giving the birthplace of the adult males, it may be well to remember that persons may be born in England of Irish, or Scotch, or Welsh fathers, or in Canada of English, Irish or French fathers; and the same is true of other nationalities.

The percentage of the male adults of each nationality to the total number of male adults, compared with the percentage of

citizens of each nationality to the total number of citizens, will indicate the nationalities that have shown the greatest desire to avail themselves of the privileges of citizenship.

The percentage of male adults by nativity to the total number of male adults is as follows: Canadian French, 7.60 per cent.; Canadian English, 1.93 per cent.; Irish, 13.29 per cent.; English, 8.31 per cent.; Scotch and Welsh, 1.99 per cent.; German, 1.67 per cent.; Swedes, 1.69 per cent. The percentage of citizens by nativity to the total number of citizens is as follows: Canadian French, 3.61 per cent.; Canadian English, 1.16 per cent.; Irish, 11.50 per cent.; English, 6.34 per cent.; Scotch and Welsh, 1.53 per cent.; Germans, 1.33 per cent.; Swedes, .86 per cent. From which it will appear that the Irish, English, Scotch, Welsh and Germans have availed themselves of the privileges of citizenship to a greater degree than other nationalities.

Table LI compares the total vote for governor, in April, 1895, with the number of persons who could have qualified to vote at that election, and the number of those who did qualify. The number of those who could have qualified is the number of legal voters reported in this census, and the number of those who did qualify is taken from the reports made to the Secretary of State by the town and city clerks. The vote given for governor is taken from the official figures of the State manual. This table shows that 79.74 per cent. of the legal voters took the necessary steps to qualify for the April election, and of those who qualified 63.80 per cent. voted. Those who voted represent 50.87 per cent. of the legal voters, or those who might have qualified.

It will, perhaps, be suggested that the year 1895 is an unfortunate one to use for comparative purposes, inasmuch as the political conditions at that time were not such as to warrant even an average interest in the result of the election. If the year 1896 is taken, which was a presidential year, it is found, from the records of the Secretary of State, that 73,207 persons qualified to vote at the spring election. If to the total of possible voters in 1895 is added the number of non-voters, which may be presumed to represent those who have qualified or attained citizenship during the year, and also the number of native born males who were 20 years of age in 1895, the result is a total of 93,010 who might have qualified to vote in the elections of 1896. The total vote for president, in this State, in that year, was 54,785, or 74.84 per cent. of those who qualified to vote, and 58.90 per cent. of those who

could have qualified. It is well known by those who are familiar with the political conditions in this State for 1895 and 1896 that in neither year were they favorable to a large registration or a large vote.

Similar comparisons in the 1885 census show that 61.4 per cent. qualified of those who might have qualified ; 46.2 per cent. voted of those who might have qualified ; and 75.2 per cent. voted of those who qualified. It will be noticed that in this table the figures for the town of Glocester show a few more qualified voters than there are legal voters in the town according to the returns of the census. It is well known that in this town, perhaps more so than in any other town in the State, the qualification of voters is given great attention, and the slight difference may be an error on the part of returns sent to the Secretary of State, or may be caused by some defect in the report of the enumerator, or persons who voted in April may have removed from the town by the time the census was taken. It seems to be an incident which proves the general accuracy of the census returns, that in a town where the political duties are so closely attended to, the figures of the town clerk and of the State census should so nearly agree.

A table showing the gubernatorial and presidential votes in this State from the year 1802 to 1896, inclusive, will draw attention to the fact that previous to 1895 there were three years in which the gubernatorial vote exceeded that cast in the census year, and that the vote for president in 1896 was only 1,589 more than that given in 1892.

MISCELLANEOUS TABLES.

Table LV shows the number of paupers 15 years of age and over, by age periods, sex, general nativity, and nativity of father. The term "pauper," used in relation to the population classified in this table, means all those who are supported wholly at public expense in poor farms and other institutions. The table, therefore, does not represent the entire number of paupers in the State, taking the term in its broadest sense, for it does not include those who are boarded out in private families, as is the custom in some towns, nor those who are receiving what is known as outdoor relief, and are entirely dependent upon public charity for their support. Persons living in private families at the expense of the town were, for obvious reasons, generally reported to the enumerators as "boarders," and it will be seen how impracticable it was to include their number in this table. There are in the State 661 paupers as shown by this table, of whom 334 are males and 327 are females; a decrease of 48 males and 53 females compared with 1885. Considered by age periods, there is a decrease of 1 in the age period from 20 to 24 years; a decrease of 30 in the period of 25 to 29 years; a decrease of 29 in the period of 30 to 34 years; a decrease of 28 in the period of 35 to 39 years; a decrease of 41 in the period of 40 to 44 years; and a decrease of 33 in the period of 45 to 49 years. There is an increase in the ages of 50 years and over of 48, of whom 46 are males, and an increase of 13 between the ages of 15 and 19 years. It may be thought that the decade, with its large increase of population, should show an increased number of paupers, but it must be remembered that the past ten years have seen a great development in charitable enterprises, in the erection and enlargement of institutions where aged and infirm people are kept during their last days upon the payment of a nominal sum through private generosity. The system of outdoor relief has also been greatly extended.

Of the 661 paupers, 259, or 39.18 per cent., are of Rhode Island

birth, 155 of whom are 50 years of age and over. The number of other native born is 70, making the percentage of native born paupers to the total, 49.77 per cent. Considered by the nativity of the father, 185, or 27.99 per cent. of the total number were born of Rhode Island fathers, and 67 of other native fathers, making the paupers born of native fathers 38.12 per cent. of the total number.

In 1885, those of Rhode Island birth formed 49.48 per cent., and the other native born 7.61 per cent. of the total number of paupers. Those born of Rhode Island fathers formed 39.37 per cent., and those born of other native fathers, 9.32 per cent. The number of paupers in the State in the several censuses since 1860 is as follows: 1860, 613; 1865, 543; 1870, 634; 1875, 506; 1880, 553; 1885, 762.

Table LVI treats of the blind, deaf, dumb, idiotic, and insane. The total number of these in this census is 1,705, of whom 867 are males, and 838 are females. Compared with 1885, the figures fall short in several of these classes, and under several censuses there is a great variance in the statistics given of these defective persons. Great care has been taken by the department in examining the reports of the enumerators in regard to this class of population, and the table is an accurate presentation of the data that has been received.

Statisticians agree that in regard to these defective classes it is very difficult indeed to obtain information that is satisfactory. The enumerator, unless he is fully acquainted with the territory which he canvasses, must depend entirely upon the statements made by the person he interviews, who in most cases is the mother, and the natural inclination to hide any defect in the family is generally followed in replying to the inquiries from census agents. In the case of the insane, where statistics are mainly obtained from institutions, the results are more satisfactory. The figures of this census denote a total of 824 insane persons in the State, of whom 410 are males, and 414 are females; an increase of 132 males, and 83 females during the decade.

There is no certain basis upon which an estimate can be formed of the increase that should have taken place in the number of these defective classes during the decade, because the conditions affecting this State are peculiar. The population has been largely augmented by persons of foreign birth, and it is well known that in recent years the rules in regard to the landing of physically

defective immigrants have been more severe, and have been more rigidly enforced.

The following table shows the number of blind, deaf and dumb, idiotic and insane found in the State by successive censuses since 1850:

CLASS.	1850.	1860.	1865.	1870.	1875.	1880.	1885.	1895.
Blind	67	85	120	121	176	300	246	272
Deaf and dumb.....	65	56	89	64	83	150	91	79
Idiotic.....	114	101	140	123	139	234	218	106
Insane.....	217	288	287	312	424	684	609	824

Tables LIII and LIV present interesting statistics regarding the veterans and widows of veterans residing in this State. From the tables of 1885 it would appear that there were 5,641 veterans residing in the State in that year, which, compared with the number reported in this census, shows a decrease during the decade of 476, or 8.44 per cent. There is a decrease of 69 single and 718 married, and an increase of 282 widowers. In this census 29 are reported as divorced. The number of children 16 years of age and over, in Rhode Island, of veterans, has decreased during the decade from 7,710 to 2,969. The number of pensioners has increased from 859 to 2,674. Of the total number of veterans, and widows of veterans, 41.02 per cent. receive pensions. The widows of veterans have increased during the decade from 772 to 1,354.

The table relating to foreign born soldiers and sailors shows a decrease in this class of 125 during the decade, or 12.28 per cent. In 1885, 40.77 per cent. of the foreign born soldiers and sailors were aliens. Under this census only 92, or 10.30 per cent., are aliens.

Table LX is a presentation regarding the free and subscription libraries of the State containing 1,000 volumes and over. To permit of comparisons with the list given in the 1885 census report, the following libraries of fewer than 1,000 volumes, but containing at least 300 volumes, is given:

LOCATION.	Name of Library.	Number of Volumes.	
Bristol.....	High School.....	School.....	300
Central Falls.....	High School.....	School.....	300
Johnston.....	High School.....	School.....	300
Newport.....	Rogers High School.....	School.....	400
Oaklawn.....	Free Public Library.....	General.....	850
Pawtucket.....	High School.....	School.....	600
Providence.....	Evangelical Y. W. C. A.....	General.....	560
".....	Franklin Society.....	Scientific.....	650
".....	Lincoln School.....	School.....	500
".....	Medical Library (Rhode Island Hospital).....	Medical.....	600
".....	St. Mary's Seminary.....	School.....	900
".....	St. Xavier's Academy.....	School.....	600
".....	Soldiers and Sailors Historical Society.....	Historical....	500
Saundertown.....	Willetteville Free Library.....	General.....	747
Warren.....	High School.....	School.....	300

The laws of the State contemplate no such civil division as a village, yet there are, in nearly all the towns of the State, certain village communities having a distinct name, whose existence is just as much a political and historical fact as if their boundary lines were settled by statute law. The census enumerators were instructed to report not only the town, city or ward, in which the person resided, but also the village or locality, and from the information thus obtained Tables LXI and LXII have been compiled. Table LXI is a list of cities, towns, villages, localities and post offices, and the localities and districts named therein are those which the enumerators' returns show to contain more than two families. Table LXII gives the population of the principal villages. Its figures must be considered merely as approximate, inasmuch as the boundary lines of villages are uncertain, and not defined by law, and in many cases are fixed only by tradition.

Table LVII deals with the subject of valuation, indebtedness and taxation, and in the main is self-explanatory. It shows that during the decade the valuation of the towns and cities has increased 35.22 per cent. Table LVIII, which relates to savings bank depositors and deposits, shows that the average deposit to each depositor is, in the census year, \$508.18, as against \$445.23 in 1885. The number of depositors is 135,252, as against 116,381 in 1885, an increase of 16.21 per cent. during the decade.

From the report of the Commissioner of Education Table LIX has been compiled, containing statistics in regard to the expenditures for school purposes. Comparisons with a somewhat similar table in the 1885 census show that there has been an increase of 57 school buildings, or 12.45 per cent. In the value of buildings the increase is \$1,897,752, or 85.21 per cent. Receipts show an increase of \$853,287.11, or 109.40 per cent., and current expenditures an increase of \$532,351.77, or 97.14 per cent. The average salary of male teachers has increased during the decade from \$745.95 to \$962.29, and of the female from \$406.50 to \$473.07. The number of pupils to a teacher in 1885 was 35; in 1895 it is 32; while the cost per capita has increased from \$15.54 to \$17.07.

MANUFACTURES.

More comprehensive in many particulars than ever before is the presentation, in this report, of the manufacturing business of the State. It is true that a few industries that were included in the manufacturing tables of 1885 are omitted from this census, but, as previously explained, they are mechanical trades rather than manufacturing industries, and their absence from the census in no way impairs the picture presented of the growth of manufacturing in the State during the decade.

The prime object of State statistics of manufacturing is to show the condition of the industries upon which the population depends mainly for its livelihood. Therefore a special effort was made by this census to secure a thorough representation of the textile, jewelry, metal work and machinery, rubber goods and stone industries; and this having been assured, all possible attention was devoted to minor industries.

It is not surprising that the manufacturer should at first resent the attempt of the State to obtain information regarding his private business. Scarcely twenty per cent. of the manufacturing schedules sent out by mail were filled out and voluntarily returned within the time required. The work of agents having this particular branch of the census in charge consisted of frequent visits upon the same firm, until confidence between the manufacturer and the department was established, and then the information desired was, to a great extent, given readily. Throughout the entire State not more than ten firms of any importance finally declined to comply with the law. But their delinquency was not permitted to interfere with the compilation of complete and finished tables. Many essential facts relative to the business of corporations and large individual firms are to-day made public in various ways, under the direction of the local or State government, and with such data as could be gleaned here and there, using reports of other firms in a similar line of business as a basis, the statistician familiar with the particular industry has little difficulty in supplying what the manufacturer declines to

furnish. Hence the tables in this report embrace every firm engaged in business in 1895, in the lines of industry specified. It is probable that future census takers will find it desirable to lessen the inquisitorial nature of the investigation, and it is certain that business rivalry and keen competition will make the manufacturer more wary than ever of giving information even to a confidential government agent. In this last investigation considerable compromise was required to obtain the detailed presentation herewith given. In regard to the question of labor and wages, for instance, the department has been unable to secure all the facts desired. While manufacturers have been perfectly willing to report the total number of males and females employed, and the total wages for the year, they have not all been willing to divide the laborers into classes, such as skilled operatives, clerks and salesmen, laborers, and children. Still fewer consented to report the rate of wages paid to the children, and male and female adults. Hence no complete table of rates of wages by age and sex can be given in this report. Very few firms were willing to state the salaries paid to officers and firm members, so the number of this class has been given separately, without any attempt to estimate the compensation they received.

The classification of the industries is more detailed than that of any previous census, State or national. Textiles are given in 13 divisions, jewelry in 7, metals and machinery in 8, lumber and wooden ware in 5, mill supplies in 3. The subjects of capital invested, expenses, labor, and wages, have been treated after the minute manner of the United States census, rather than the generalization of previous State enumerations. Further, there is now presented in detail the manufacturing interests of each of the five counties and five cities.

In publishing the facts secured, the census department has endeavored to keep strict faith with the manufacturers, and for this reason it will be observed that no industry in which fewer than three firms are engaged, has been separately specified. In the counties and towns, whenever it would be possible, by substracting the figures for several firms located in a civil division from the total of the State to secure a statement of the business of a single firm in the same line of business located in another civil division, a similar method of classification has been used.

The arrangement and detail of the tables are so explicit that it seems unnecessary to repeat in this analysis an abstract of the

general results secured. It is, perhaps, desirable to mention a few points that should be kept in mind by those who desire to use the statistics given. In "capital invested" the value of lands, buildings and plants given is undoubtedly accurate and complete, but in respect to the items showing the value of material and stock on hand, cash, and bills receivable, it is possible that the totals may be below the true value, as the manufacturers were not generally willing to report on such subjects. The figures given for annual expenses are supposed to include coal used for power and heat, and every other source of expense, except labor, material, mill supplies, and chemicals used in manufacturing processes. Efforts were made to obtain the amount paid for rent separately from the cost of power and heat, but it was found to be impracticable. The presentation of mills, factories and workshops, by materials of construction, includes only those that are owned by the firms reporting, and this is true of the statistics relating to engines and boilers and the horse-power used. The erection of large buildings solely for manufacturing purposes, in which single floors are rented to one firm with power and heat included, made impossible a different arrangement of the information obtained on that point. A new feature presented in these tables is found in the figures showing the number of firms owning electric lighting plants for power and heat, the number of arc and incandescent lamps both owned and rented.

In regard to the industries specified, it should be explained that insulated wire, and rubber tubing and webbing have been classified in the textiles because of the large amount of cotton and silk fabric entering into the product. Screws, bolts and nuts have been classified in general machinery, so as not to reveal the business of one of our largest manufacturers, and for the same reason there is a classification of machinery and tools. Job printers and lithographers do not include newspapers. It has been necessary to place illuminants,—gas and electricity,—together, because in some towns and cities one company supplies both forms of light. The large number of 20 industries not classified contains several important ones, such as brick, and menhaden oil, and guano, which could not in good faith have been given separately.

The most practical standard for measuring the importance of an industry to the community is the number of persons for whom it furnishes employment, and the amount of wages it

distributes. The amount of annual product is not so certain, because the cost of material is much larger in some industries than in others. The amount of capital invested is also uncertain, because, while it includes the land and buildings of some firms, it does not always include the capital represented by the amount of rental paid.

Taking, therefore, the items of labor and wages, we find the following relative standing of the most important industries of the State :

PRINCIPAL INDUSTRIES.	Number of wage earners.	Per cent. of total.	Wages paid.	Per cent. of total wages.
All industries.....	77,995	100.00	\$30,874,281	100.00
Textiles.....	48,892	62.69	16,660,084	53.96
Metals and machinery	10,701	13.72	5,384,604	17.44
Jewelry and silverware.....	6,883	8.82	3,653,834	11.83
Rubber boots.....	3,211	4.12	1,050,426	3.40
Stone work.....	1,441	1.85	719,316	2.33
Wood work	1,120	1.44	603,472	1.95
Total for textiles...	48,892	100.00	\$16,660,084	100.00
Bleacheries, etc.....	4,730	9.68	1,995,124	11.98
Cotton goods.....	25,086	51.31	8,058,750	48.37
Woolen goods.....	15,285	31.26	5,466,074	32.81
Other textiles.....	3,791	7.75	1,140,136	6.84

In regard to capital invested the ratio for these industries is as follows :

PRINCIPAL INDUSTRIES.	Capital invested.	Per cent. of total.
All industries.....	\$126,207,790	100.00
Textiles.....	73,536,762	58.27
Machinery.....	18,056,872	14.31
Jewelry and silverware.....	12,175,444	9.65
Rubber boots.....	4,049,485	3.21
Wood work.....	1,322,346	1.05
Stone work.....	818,658	.65
Textiles.....	\$73,536,762	100.00
Bleacheries.....	6,841,100	9.30
Cotton goods.....	39,348,238	53.51
Woolen goods.....	22,539,160	30.65
Other textiles.....	4,808,264	6.54

In Bristol county the chief industries are brick-making, cotton and woolen fabrics, rubber boots and shoes, boat building and iron work.

In Kent county, of the total of 7,360 wage earners, 7,095 are engaged in the textiles.

In Newport county, outside of the city of Newport, 510 of the 625 wage earners are employed in textiles.

In the towns of Providence county 11,426 of the 12,525 wage earners are employed in the textiles.

In Washington county 3,065 of the 4,387 wage earners are employed in textiles, and 1,057 in stone work.

In Central Falls, of the 2,610 wage earners, 1,826 are employed in textiles, and 327 in metal work.

In Pawtucket, out of 10,053 wage earners, 7,686 are in the textiles, 1,214 in machinery and metals. Other important industries of that city are wood mill supplies, soaps, planing mills, doors, sashes, blinds, boxes, brooms and brushes, cardboard and glazed paper, cigars and tobacco.

In the city of Providence, of 29,709 wage earners, 11,200 are employed in textiles (chiefly woolen), 6,589 are in jewelry, 7,490 in machinery and metal work, 641 in rubber boots, 214 in soaps, 577 in wood work, 423 in printing, and a large number in gas and electricity which cannot be given separately.

In Woonsocket, of 7,419 wage earners, 4,868 are in textiles, 800 in machinery and metals, 220 in leather and wood mill supplies, and a large number in rubber boots and shoes.

The following table will show the number of wage earners in the civil divisions as arranged for the manufacturing table, and the percentage of each division to the total :

COUNTIES AND CITIES.	Number of wage earners.	Per cent. to total.	Total population.	Per cent. to total population.
THE STATE	77,995	100.00	384,758	20.27
Bristol county	2,980	3.82	12,224	24.38

Children under 16.....	152 28	156 21	165 31	150 00	—	160 00

It should be understood that these figures include both male and female help ; and that the larger sums found in the third class, unskilled wage earners and laborers, are due to the fact that the average is not affected by the smaller wages paid to females.

It would, however, be unfair to the manufacturers to leave the question of wages in this condition, so there is herewith presented a series of tables formulated from schedules showing the amount of wages paid to employees of each sex during the week when the largest number of persons was employed.

Sixty-six firms, manufacturing cotton cloths, yarn, thread, banding, wick, twine, etc., make the following report :

WAGES.	Males.	Females.
Under \$5	1,706	2,682
\$5, but under \$6.....	698	1,451
\$6, but under \$7.....	1,056	1,485

It would not be a difficult matter to make further comparisons, but they would serve no useful purpose. This is a period of rapid evolution in the methods of manufacturing, and of decreasing and fluctuating values both in raw materials and finished product and the aggregate of values to-day can scarcely be set off against those of ten years ago. More plainly is this to be seen when an attempt is made to compare the statistics of manufactures in this census with those of 1875, in which the values of materials and product are greater than those under this census, while the total number of hands employed is 21,445 less.

In the general survey of the census work there is presented a comparison of the principal industries as shown in this census and in 1885, which indicates the following increase during the decade :

INDUSTRIES.	Capital invested.	Wage earners.	Wages paid.	Value of product.
Textiles.....	\$37,365,439	12,217	\$5,984,042	\$17,839,814
Metals and machinery.....	10,207,419	3,946	1,538,970	3,681,552
Jewelry and silverware.....	9,914,257	3,005	1,644,757	6,130,216
Rubber goods.....	2,949,557	1,319	561,492	1,669,886
Stone and marble work.....	616,176	654	406,610	331,362

In the manufacturing industries of the entire State there is an

approximate increase of capital invested, \$68,000,000 ; wage earners, 22,000 ; wages paid, \$10,500,000 ; value of product, \$31,000,000.

The statistics dealing with the lighting of factories and workshops show the use of electricity, gas or oil as an illuminant. Of the 1,224 factories or workshops considered, 671 are lighted by gas, 246 by oil, 207 by electricity, and 86 by gas and electricity. Electric lighting plants are owned by 135 firms, using a total of 4,874,134 candle power. Electric light is rented by 158 firms using 471,564 candle power. These figures should form a valuable basis of comparison for future reports on this subject.

AGRICULTURE.

The statistics of agriculture secured by this census show a decline during the decade in the extent of farm lands, in the number of farms, and the value of farm property and product. The agricultural tables are formed from reports received from 6,441 farms of one acre and over, a decrease of 622 since 1885. This decrease is made up of 94 in Bristol county, 231 in Kent county, 185 in Newport county, 10 in Providence county, and 102 in Washington county. Considered by the size of the farms we find a decrease of 189 in farms of from 1 to 2 acres in size, 38 in farms 3 to 9 acres, 53 in farms 20 to 49 acres, 235 in farms 50 to 99 acres, 168 in farms 100 to 199 acres, and 1 in farms 1,000 acres and over. There is an increase of 17 in farms 10 to 19 acres in size, 22 in farms 200 to 299 acres, 17 in farms 300 to 399 acres, 4 in farms 400 to 499 acres, and 2 in farms of 500 to 999 acres.

In 1885 there were 521 farms enumerated under 1 acre, representing a total acreage of $153\frac{1}{2}$ acres. Deducting this area from the total farm acreage reported in 1885, the result is $479,536\frac{1}{2}$ acres, or $14,492\frac{3}{4}$ more acres than are reported in this census. The figures for this census show an increase during the decade of $7,258\frac{3}{8}$ acres in plowed and tilled land, and 8,556 acres in unimproved lands, or, including quarries, mines and sand-pits, $8,972\frac{1}{4}$ acres; and a decrease of $27,195\frac{7}{8}$ acres in pasture and mowing lands; and $3,527\frac{1}{2}$ in wood lands and orchards.

The statistics of poultry and bee-keeping are in this census given in separate tables, as they include poultry and bee keepers other than those who reside on farms. For comparative purposes, the aggregate figures of 1885 must therefore be used minus the figures for poultry, bees, and farms under one acre (except green-houses and their product). This arrangement gives a total value of farm property in 1885 of \$37,978,113, showing a decrease during the decade of \$7,218,415, of which \$5,232,131.50 is in lands, \$805,195.50 in buildings, \$32,644.20 in implements, \$801,618.30 in

live stock, \$36,451.00 in greenhouses, and \$310,374.50 in other capital.

The total farm product in 1885, exclusive of poultry, eggs, honey, and the products of farms under one acre, except greenhouses, was \$6,533,245, showing a decrease of \$56,996.13 in total values during the decade.

An increase is shown in only two divisions of farm product during the decade. The value of vegetables raised in 1885 on farms of one acre and over was \$1,028,766; in this census it is \$1,035,982.18. The dairy product for 1885 on farms of one acre and over amounted to \$1,544,709; under this census it is \$2,589,375.58.

The decrease of area and values does not mean, as may appear at first sight, a decline in the agricultural interests of the State. The decrease in the value of farm property during the last ten years is a fact but too well known to owners of agricultural land. The fall in the price of farm produce is equally well understood, but a closer examination of the detail furnished in this census will show that the farmers are turning their attention to market gardening and dairy farming, as the following abstract of quantities of vegetables and milk produced in 1885 and 1895 seems to demonstrate:

ON FARMS OF ONE ACRE AND OVER.

VEGETABLES AND MILK.	1885.	1895.
Asparagus, pounds.....	104,497	158,528
Beans, bushels.....	39,747	49,356

Horse and cattle raisers and dealers.....	99	99	—
Poultry raisers and dealers.....	115	110	5
Aggregate.....	11,993	11,868	125

POPULATION ENGAGED IN AGRICULTURE, BY COUNTIES.

COUNTIES.	Number.	Per cent.
Bristol county.....	551	4.59
Kent county.....	1,703	14.20
Newport county.....	2,334	19.46
Providence county.....	5,189	43.27
Washington county.....	2,216	18.48
The State.....	11,993	100.00

It may be well for those who closely examine and use the detail of these agricultural tables to consider that the figures are compiled from reports made by several thousand persons, many of whom are unaccustomed to furnish precise accounts of their business. The tables of this report are a faithful presentation of the returns made by the farmers of the State, and hence, for the reason before stated, may contain a few items that may be questioned, such, for instance, as the $4\frac{1}{4}$ acres of salt marsh land in the town of Coventry, which is in accord with the returns made. It is proper here to point out two slight typographical errors, one on page 759, where the quantity of string and shell beans should be 1,091 bushels, and the other on page 792, where the quantity of Indian corn should be 21,725 bushels.

Tables LXXI and LXXII show the average value of land per acre, the relative standing of each town in regard to capital invested, the farm products, and their average value per acre, and the per cent. of product to capital invested. The high value of land in the cities and manufacturing centres, compared with the value in towns declining in population, will be noticed. South Kingstown is the banner agricultural town, standing first in regard to capital invested, and second in regard to the value of products. The town of Cranston is first in regard to the value of product, and third in regard to capital invested. The average monthly wages paid, shown in Table LXXIII, may appear somewhat high, but it should be remembered that the greater part of the farm help is required only a portion of the year.

At the special request of organizations and persons interested in the poultry business, the department endeavored to secure a more comprehensive representation of this industry than had been previously attempted. It is felt that the results secured warrant the expense incurred and demonstrate that the poultry industry is of sufficient importance to merit the particular attention it has received. The tables give the detail of poultry used for breeding and egg production, number and value of product, and the poultry stock on hand at the close of the 1895 season. The statistics are from the reports of 11,151 poultry keepers, a majority of them doubtless undertaking the care of fowls as a matter of recreation, but not a few finding it a profitable investment, and engaged in it as a business to a larger extent than might be popularly supposed. The poultry statistics presented in the 1885 census include only birds on farms, and show poultry on hand on November 1st, 1885, to the value of \$301,749, and an annual product of birds and eggs amounting to \$590,258. This census shows birds used for breeding and egg production at the beginning of the season of 1895 to the value of \$300,585.79, an annual production of \$1,178,183.45; and birds on hand at the close of the season to the value of \$397,598.12. The detailed figures have been submitted to poultry experts, and are by them considered a satisfactory presentation of the industry in this State, both as regards the quantity of the several kinds of poultry and the ratio of production to the stock used, on which latter point it will be found that there is no agreement with the census of 1885. Compared with the last State census, there is an apparent decrease in the number of ducks, geese, and turkeys on hand, and a decline

during the decade in the production of those birds. This is admitted to be in harmony with the condition of the poultry business by those who watch the industry closely, and is caused by the difficulty of keeping the stock free from certain diseases, and also the Western competition, which tends to make the raising of such poultry less profitable.

Returns were received from 564 bee-keepers, showing a total of 2,920 swarms, valued at \$12,681.70; and a product of 28,365½ lbs. of honey, valued at \$5,508.75; and 1,759½ lbs. of wax, valued at \$409.04. Compared with 1885, this shows an increase of 981 swarms, an increase of value of \$2,737.70, an increase of 2,258½ lbs. of honey, and an increase of \$148.79 in value of product. It is probable, however, that the figures for 1885 included only swarms on farms.

FISHERIES.

The fishery industry in this State is peculiar in that it does not lend itself easily to a perfect and complete representation by means of statistics. Excepting for large firms, engaged in the oyster fishery and oil and guano business, the fishermen keep little account of the extent and value of their catches; consequently, the reports made are largely the result of estimate. There is also found a great variance in the price quoted for fish in the returns received, and this adds greatly to the difficulties of compilation. The figures given in these tables represent, so far as possible, all those who are engaged for at least a portion of the year in the fishing industry as a means of livelihood. The number reported as employed in this industry is 1,463, and it includes boatmen, common laborers, and those who are engaged in the oil and guano factories. The 755 persons enumerated in the occupation table under the classification of fisheries represent those who follow the industry as a regular means of employment, and do not include boatmen, sailors, laborers, or factory employees. The tables show for the year 1895 a capital invested of \$921,429, an increase since 1885 of \$232,591, chiefly in the value of vessels, seines, and other implements. There is an increase shown of 19 steamers, 26 sailing vessels, and 572 row-boats. The products amount to \$1,000,595, a decrease of \$184,975, compared with 1885.

The following table of comparison shows the values and quantity of product under the last three State censuses:

VALUES.	1895.	1885.	1875.
Total value of product.....	\$1,000,595	\$1,185,570	\$1,224,659
Shell-fish.....	455,598	542,296	825,675
Other food fish.....	349,419	228,630	298,484
Fish for oil and guano.....	195,578	414,644	100,550
QUANTITIES.			
Oysters, bushels.....	210,863	320,059	496,787
Clams, bushels.....	86,894	65,485	67,480
Quahaugs, bushels.....	18,722	17,994	15,294
Scallops, bushels.....	41,871	34,008	72,556
Lobsters, pounds.....	593,735	449,815	377,075
Food fish, pounds.....	7,240,824	6,181,108	7,740,860
Fish for oil and guano, barrels.....	262,332	518,553	—

Compared with 1885 there is an increase in all shell-fish product, except the oyster, and it is well known that the depredation of the star-fish in the waters of the bay in recent years has greatly interfered with that industry. A large increase is shown in the quantity of lobsters caught, as well as an increase in the fish for food. The State is now giving great attention to the preservation of young lobsters, and is also experimenting with a view to determining the best means of exterminating the star-fish, and it is probable that the next enumeration of the fishing industry of the State will show a beneficial result from these efforts.

CAPITAL AND PRODUCT.

The following tables show the total capital invested in and annual product of the several industries presented in this census for each county, and the percentage of aggregate capital invested, and annual product of each county, to the total for the State :

CAPITAL INVESTED.

COUNTIES.	Agriculture.	Manufactures.	Poultry.

COMMERCE.

The maritime commerce of the State, which in the early part of the century would have required a prominent place in a review of the industrial life of the community, now merits but little notice. The statistics upon this subject, given in this volume, are, however, presented in the hope that in the future censuses they will be used to show a gratifying re-awakening in this branch of industrial life, for which Rhode Island was once famous. The tables under the head of commerce show in detail the character of the imports and exports credited to the customs districts of the State during the years from 1886 to 1895, inclusive, and the value of the duties collected. Statistics taken from United States reports in regard to the vessels engaged in traffic in Rhode Island waters, and the vessels built in the three customs districts, are also given. The total imports for the customs districts of Rhode Island in 1885 were \$490,618.00, or .08 per cent. of the total imports of the United States, which, in that year, amounted to \$577,527,329. In 1895 the imports of the State amounted to \$993,676, or .14 per cent. of the United States, which were \$731,969,965. The exports from Rhode Island by water are insignificant, most of the exports of manufacturing being transported by rail to other ports for shipment. The report of the railroad commissioner for the year ending June 30th, 1895, shows 13,196,820 tons of merchandise carried, an increase of 1,385,238 over the previous year.

There is, of course, an extensive coastwise trade in coal, lumber and building material, of which, at the time of writing this report, the following statistics for the year ending December 31st, 1897, for the port of Providence, are available:

INWARD AND OUTWARD FREIGHTS.

Coal.....	1,407,536 tons.
Lumber and products.....	64,989 "
Oil, naphtha, etc.....	41,110 "
Builders' materials and foundry supplies.....	45,211 "
Corn, potatoes, and salt.....	8,761 "
Logwood, rosin, etc.....	5,785 "
General merchandise.....	579,583 "
Total.....	2,152,975 "

The vessels entering and leaving the port during the same period are as follows (each entrance and departure being counted as one):

VESSELS.	Number.	Average draft.	Average tonnage.
Steam, freight and passenger.....	706	12 ft.	600
“ freight, mainly.....	261	18 “	1,433
“ passenger, mainly.....	3,201	7 “	518
“ fishing.....	1,248	3 “	30
“ tugs.....	1,026	13 “	100
“ pleasure boats.....	1,300	5 “	30
Sail, freight.....	772	18 “	1,500
“ pleasure boats, large.....	303	7 “	40
“ pleasure boats, small.....	1,000	3 “	7
Barges.....	1,439	16 “	1,200

During the census year the government plan for widening and deepening the channel approach of Providence river was almost completed. But the improvements have done little more than furnish a better anchorage basin. Before Providence and the State can, from a commercial standpoint, utilize more fully the splendid natural waterway of the bay and river, the straightening and widening of the channel along a large portion of the bay, and the removal of a number of shoals and reefs, must be accomplished. The coöperation of the national government in this work, with an essential public spirit among our citizens, that will promote the construction of a modern system of dockage, may eventually attract back to Rhode Island much of her former prestige and power as a maritime State.
